Data in Many Forms..

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

CANSIM Division

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-8200) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montreal	(283-5725)	Regina	(359-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(973-6586)	Vancouver	(666-3691)

Toll free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional references centres.

Newfoundland and Labrador	Zenith 0-7037
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192
Quebec	1-800-361-2831
Ontario	1-800-268-1151
Manitoba	1-800-282-8006
Saskatchewan	1(112)800-667-3524
Alberta	1-800-222-6400
British Columbia (South and Central)	112-800-663-1551
Yukon and Northern B.C. (area served by NorthwesTel Inc.)	Zenith 0-8913
Northwest Territories (area served by NorthwesTel Inc.)	Call collect 420-2011

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales, Statistics Canada, Ottawa, K1A 0T6.

LIBRARY

Canadian Statistical Review

Data in this publication were retrieved from CANSIM† (Official Mark of Statistics Canada for its Canadian Socio-Economic Information Management System), and processed to create a photo-ready copy from which this publication was produced. CANSIM is the Statistics Canada computerized data bank; series published in this Review (as well as other data) are available on computer printouts, cards, tape or directly via terminal.

The identification numbers at the top of each column of data refer to the unadjusted and seasonally adjusted monthly or quarterly data in this column. Series maintained by Statistics Canada carry a "D" prefix (e.g. D 1375). The "B" prefix (e.g. B 1437) identifies series in CANSIM which are maintained by the Bank of Canada.

More details on which data is available can be found in the following:

CANSIM Main Base Series Directory, 1984 — $75.00 Canada, $90.00 other countries

The Directory includes an index which serves to identify, at a fairly aggregative level, the contents of the CANSIM database. This index provides a key to the Series Directory and is the first step in locating series from the CANSIM Main Base.

This Directory is a detailed guide to the data on the CANSIM Main Base. It gives the title, start date, source of the data, and other descriptive material.

CANSIM Mini Base Series Directory, Catalogue 12-569 — $45.00 Canada, $54.00 other countries

This Directory is a detailed guide to the data on the CANSIM Mini Base — a standard subset of data originating from the CANSIM Main Base which is available at various Secondary Distributors.

CANSIM-Cross Classified Data Base Index — $7

This index provides a summary of available data on the Cross Classified Data Base.

CANSIM-Cross Classified Data Base Directory — $20

This directory provides a detailed guide to the Cross Classified Data Base. It provides a description of the structure of each table.

The seasonal adjustment method applied to economic time series at Statistics Canada is a computerized ratio-to-moving average method. The standard computer program used is the Statistics Canada X-11-ARIMA seasonal adjustment method. Seasonal adjustment removes the effect of repetitive intra-year variations resulting from normal differences in weather, holidays with invariable dates, or other events which repeat with the same timing.

While seasonal adjustment allows a much better look at the underlying trend of a series, the adjusted series will contain irregular fluctuations. Small changes between months in the adjusted series may simply be erratic movements and, to obtain a clearer idea of the underlying trend, users should examine the adjusted series over a number of months. The MCD, or Months for Cyclical Dominance, in a table containing seasonally adjusted series, indicates the smallest span of months for which the average percent change without regard to sign in the trend cycle is greater than that in the irregular factor. For the smoothest series in MCD is 1, for the most erratic series it is 6. Applying a moving average of the period equal to the MCD tends to smooth irregular movements which may obscure the underlying trend.

Editorial Board

This publication is produced under the guidance of the Canadian Statistical Review Editorial Board, composed of the following members:

J.S. Wells (Acting Chairman) — Assistant Chief Statistician, National Accounts and Analytical Services Field
R.E. Drover — Director, Transportation Division
B.J. Lynch — Director General, Operations Branch
E. Boyko — Director, Electronic Data Dissemination Division
G.J. Brackstone — Director General, Methodology Branch
A. Meguerditchian — Director, International and Financial Economics Division
L.O. Stone — Director, Population Studies Division
P.N. Triandafillou — Director, Agriculture/Natural Resources Division
K. Lal — Director General, System of National Accounts Branch
D. Bergeron — Editor, Canadian Statistical Review

Inquiries about the contents of the Canadian Statistical Review should be directed to the editor at: CANSIM Division, 9th Floor, R.H. Coats Bldg., Tunney's Pasture, Ottawa, Ontario, K1A 0T6.

Subscriptions

The *Canadian Statistical Review* and other catalogued publications of Statistics Canada, may be ordered from Publication Sales and Services, Statistics Canada, Ottawa, K1A 0T6 and remittances made payable to the Receiver General for Canada.

Correspondence should be directed to the *Canadian Statistical Review* CANSIM Division, Statistics Canada. R.H. Coats Tower, Ottawa, Ontario, K1A 0T6.

---

[1] In general the term filtering refers to removing, or filtering out, movements of the data that repeat themselves with roughly the same frequency. [2] Composite Index of Housing Starts (units), Building Permits (dollars), and Mortgage Loan Approvals (number). [3] Deflated by the Consumer Price Index. [4] Toronto Stock Exchange (300 Stock Index excluding oil and gas component).

Source: Quarterly Economic Summary: Statistical Supplement (Cat. 13-007E), Statistics Canada. For more information on filtering consult Quarterly Economic Summary, STC (Cat. 13-006).

Section 2 ▪ Population Statistics

14 1. Population by Province
14 2. Immigration to Canada, by Country of Last Permanent Residence
15 3. Immigration to Canada, by Province of (Intended) Destination
15 4. Immigration to Canada, by (Intended) Occupational Group
16 5. Births, by Province
16 6. Deaths, by Province
16 7. Marriages, by Province

---

[1] The occupational status of the majority of the persons destined to the labour force is determined by immigration officials by an examination of documentary evidence provided by the immigrants. The classification of occupations is similar to that used in the 1971 Census; see Occupational Classification Manual, Census of Canada, 1971, Catalogue Number 12-536E, Vol. I. [2] Beginning with 1978, this is subdivided into entrepreneurs and managers-administrators. For breakdown refer to CANSIM main base. [3] Includes logging, fishing, trapping and hunting. [4] Includes mechanical and construction. [5] Includes a small number in non-specified occupations. [6] Beginning with 1978 includes fiancés and fiancées. [7] Does not include students entering Canada on students' visas. [8] Includes also retired persons, elderly dependents, and other unspecified persons.

Section 3 ▪ System of National Accounts

1. Income and Expenditure Accounts

18 1.1 Gross Domestic Product, Income Based
18 1.2 Gross Domestic Product, Expenditure Based
19 1.3 Gross Domestic Product at 1981 Prices, Expenditure Based
19 1.4 Relation Between Gross Domestic Product at Market Prices, Gross National Product at Market Prices, and Net National Income at Factor Cost
20 1.5 Sources and Disposition of Gross Saving
20 1.6 Sources and Disposition of Personal Income
21 1.7 Personal Expenditure on Consumer Goods and Services by Type of Expenditure
22 1.8 Personal Expenditure on Consumer Goods and Services by Type of Expenditure, at 1981 Prices
22 1.9 Government Sector Revenue and Expenditure
23 1.10 Federal Government Revenue and Expenditure
24 1.11 Provincial Government Revenue and Expenditure
25 1.12 Local Government Revenue and Expenditure
26 1.13 Hospital Revenue and Expenditure
26 1.14 Canada and Quebec Pension Plan Revenue and Expenditure
27 1.15 Implicit Price Indexes, Gross Domestic Product, (1981-100). Seasonally Adjusted at Annual Rates

2. Domestic Product by Industry at Factor Cost

28 2.1 Gross Domestic Product by Industry at Factor Cost in 1981 prices, Quarterly
30 2.2 Gross Domestic Product by Industry at Factor Cost in 1981 Prices, Monthly

3. Balance of International Payments

37 3.1 Canadian Balance of International Payments, Current Account, All Countries
38 3.2 Canadian Balance of International Payments, Current Account, Area Distribution
39 3.3 Canadian Balance of International Payments, Capital Account, All Countries

Table 1. Income and expenditure accounts

[1] Includes military pay and allowances. [2] These aggregates differ from those shown in earlier publications in that they are on a "domestic" basis and thus include interest and dividends paid to non-residents and exclude interest and dividends received from non-residents. [3] Includes profits (net of losses) of government business enterprises and other government investment income. [4] Includes value of physical change in farm inventories. An adjustment has been made to take account of the accrued earnings of farm operators arising out of the operations of the Canadian Wheat Board Book value of inventories is deflated to remove the effect of price changes and the derived physical change is then valued at average prices of the current period to obtain the value of physical change. The difference between this value of physical change and the change in book value is called the inventory valuation adjustment. [5] See footnote 3, Table 1.2.

[1] Includes outlay on new durable assets such as building and highway construction by governments other than government business enterprises. Excludes defence construction and equipment which is defined as current expenditure. [2] Includes capital expenditures by private and government business enterprises, private non-commercial institutions and outlays on new residential construction by individuals. Capital expenditure is defined to include all transfer costs on the sales and purchases of existing fixed assets. [3] The book value of inventories is deflated to remove the effect of price change and the derived "physical" change is then valued at average prices of the current period to obtain the value of physical change. The difference between the value of physical change and the change in book value is called the inventory valuation adjustment (shown in Table 1.1). [4] See footnote 4, Table 1.1. [5] Excludes investment income received from non-residents. [6] Excludes investment income paid to non-residents.

[1] The period 1961-1986 was deflated in three time periods 1961-1971, 1971-1981, 1981-1986 with price indexes based on 1961, 1971 and 1981 respectively. The prices were then linked arithmetically at the major group, component and total levels to the 1981 base. The linking process produced residual differences between the sum of the linked groups and linked aggregates. These differences are shown as adjusting entries. [2] Excludes investment income received from non-residents. [3] Excludes investment income paid to non-residents.

---

[1] Gross National Product at 1981 prices can be calculated by deflating net investment income from non-residents with the overall Gross Domestic Product implicit price index and adding the result to Gross Domestic Product at 1981 prices.

---

[1] These implicit price indexes derived by dividing the value figures in current dollars by the constant dollar figures, are current weighted price indexes They reflect not only pure price changes, but also changing expenditure patterns within and between major groups. Quarter-to-quarter comparisons based on the seasonally adjusted data are less subject to the problem of shifting weights than are similar comparisons based on data for seasonality and therefore may be used as indicators of price changes. [2] Excludes investment income received from non-residents. [3] Excludes investment income paid to non-residents.

---

[1] The labour force as a percentage of the population 15 years of age and over. The participation rate for a particular group (age, sex etc.) is the labour force in that group expressed as a percentage of the population for that group. [2] The unemployed as a percentage of the labour force. The unemployment rate for a particular group (age, sex etc.) is the unemployed in that group expressed as a percentage of the labour force for that group. Seasonally-adjusted rates are calculated by dividing seasonally-adjusted unemployment by the sum of seasonally-adjusted employment and seasonally-adjusted unemployment (i.e. seasonally-adjusted labour force by summation).

Note: Excludes inmates of institutions, members of the armed services, Indians living on reserves and residents of the Yukon and Northwest Territories. The estimates are derived from a sample survey and are subject to sampling error. In general, the smaller the estimate, the larger is the relative sampling error. For other explanatory material see notes at the end of Catalogue No. 71-001.

Source: The Labour Force (71-001), monthly.

---

[1] The number of persons covered by unemployment insurance is an estimate comprising armed forces personnel, beneficiaries and paid workers from the Labour Force Survey [2] Claimants who receive benefits through the Commission's computer pay system during the reference week [3] Benefits paid for adoption, training, work sharing and job creation claims are included in the total benefits paid. [4] Annual figures are 12-month averages

---

[1] Statistics on work stoppages include all strikes and lockouts whether legal or illegal, which last for one-half day or more and amount to 10 or more person-days of time lost. Time lost by workers indirectly affected, such as those laid off because of a work stoppage by other employees, is not included Data is published 45 days after the end of reference month. [2] The industry groups from January 1976 forward, are based on the 1970 Standard Industrial Classification. [3] The number of person-days is calculated by multiplying the number of workers involved in a work-stoppage by the number of normal working days during the stoppage. Adjustments are made for establishments on shift work, etc. [4] The total includes all work stoppages. The agriculture, finance, insurance and real estate and public administration and defence industries are not shown separately Should strikes occur in these industries, the time lost also will be shown in the total. [5] Includes publishing and allied industries [6] Includes storage and communication industries.

[1] These weights, provided as a general guide, show the relative importance of the major components of the C.P.I. They are based on expenditure values derived from quantities and prices of year 1982. [2] Includes water, fuel and electricity, and traveller accommodation [3] Excludes water, fuel and electricity.

* "For further information on the weights and methodology associated with the Consumer Price Index, see "The Consumer Price Index Reference Paper, updating based on 1982 expenditures," cat. 62-553, occasional

---

[1] Estimates of manufacturers' shipments, inventories and orders are based on a monthly survey of a sample of manufacturing establishments, benchmarked to the annual census of manufacturers. [2] Shipments of goods manufactured within the establishments. [3] Total new orders received during the period at estimated selling value, net of cancellations [4] Total manufacturing inventory owned by manufacturing establishments. Other inventory such as that of goods purchased for resale is not included

Note: All series are subject to revision each year when more recent Census of Manufactures data become available.

Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), Statistics Canada.

Table 2: Manufacturing shipments[1] by industry based on the 1980 standard industrial classification (million dollars). Projected from 1982 Census of Manufactures benchmark.

Year and month	Total shipments	Non-durable goods industries											
		Total	Food	Beverage	Tobacco products	Rubber products	Plastics products	Leather and allied products	Primary textile	Textile products	Clothing	Paper and allied products	Printing publishing and allied

[1] Separate industries series combined for the Supplementary Classification automotive products, are also components of other classifications. Other economic use classification groups are mutually exclusive and except for rounding differences add to relevant Canada totals in section 6, table 1.

Note: All series are subject to revision each year when more recent Census of Manufactures data become available.

Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), Statistics Canada.

Table 5: Estimated value of inventories owned and raw materials in manufacturing industries, by economic use classification, based on the 1980 standard industrial classification (million dollars). Projected from 1982 Census of Manufactures benchmark.

	Inventories owned				Inventories held: Total			Inventories held. raw materials						
	Consumer goods							Consumer goods						
End of period and month	Non-durable and semi-durable	Capital goods	Construction materials and components	Supplementary classification: automotive products	Consumer goods Durable	Intermediate goods and supplies	Export-oriented industries	Non-durable and semi-durable	Durable	Capital goods	Construction materials and components	Intermediate goods and supplies	Export-oriented industries	Supplementary classification. automotive products

[1] Pulpwood produced for domestic use and excluding exports, but including receipts of purchased roundwood. [2] Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp. [3] Customs exports. [4] Mill shipments destined for export.

Sources: **Pulpwood and Wood Residue Statistics (25-001), Exports by Commodities (65-004), Statistics Canada; Bulletins of the Canadian Pulp and Paper Association: "Monthly Pulp Summary" and "Monthly Newsprint Statistics".**

[1] Gas types are included. [2] Includes producers' shipments for export. [3] In some cases these shipments are not at the factory level, and stocks at beginning of month plus production less shipments do not equal stocks at end of month. [4] End of period. [5] Electric and other [6] Excludes apartment type machines [7] Excludes other than electric.

Note. Monthly data includes all producers of electric energy who generate 20 MW.h or more per year. The monthly data accounts for approximately 99% of all generation plus 100% of all imports and exports.

Note: Components may not add to totals due to rounding. Current figures in this table are preliminary and therefore subject to revision.

[1] Supply and disposition for both Crude Oil and Natural Gas will not agree because of losses, inventory changes, pipeline fuel used etc.

[2] Includes crude oil, condensate and pentanes plus.

[1] Includes domestic and imported crude oil, condensate and pentanes plus received by Canadian refineries. [2] Refinery production (from crude oil, condensate and pentanes plus, and commingled propane/butane mixes) plus other materials used. [3] Includes stove oil, kerosene. [4] Includes aviation gasoline and aviation turbo fuel. [5] Includes propane and propane mixes and butane and butane mixes. [6] Includes petro-chemical feed stocks, naphtha specialties, coke, lubricating oil and grease, still gas and other products.

---

[1] A dwelling unit is defined as a structurally separate set of living quarters having its own entrance from outside of the building, or from a common passage inside. These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All metropolitan areas and urban centres with a population of 10,000 or more, along with certain other areas of high building activity, are enumerated completely each month. The remainder of the country is covered on a sample basis quarterly.

Source: Housing Starts and Completions (64-002), Statistics Canada.

Note: Components may not add to totals due to rounding differences.

[1] Data are on a gross basis i.e. they do not take account of cancellations or alterations of loans after initial approval. [2] Agency loans (loans made by other lending institutions on behalf of C.M.H.C.) are included under C.M.H.C. [3] Includes fraternal and mutual benefit societies, Quebec savings banks and, since May 1967, chartered banks [4] Includes new and existing commercial structures and farm property.

[1] Price indexes of inputs measure only changes in prices of units of inputs. They do not reflect other important changes in costs of production, such as changing quantities and productivity of inputs. They should not be interpreted, therefore, as equivalent to indexes of cost per unit of input. Direct comparison of them with price indexes of output can yield misleading indications of the changing relationship of costs and income. The price indexes for the last two years are subject to revision. [2] The major groups include additional components than the selected ones shown.

Section 11 ▪ External Trade

1. Merchandise Trade on a Balance of Payments Basis

114 1.1 Total Exports by Major Trading Area and Section, Seasonally Adjusted, Balance of Payments Basis

114 1.2 Imports by Major Trading Area and Section, Seasonally Adjusted, Balance of Payments Basis

115 1.3 Price and Volume Indexes of Total Exports by Section, Seasonally Adjusted, Balance of Payments Basis

115 1.4 Price and Volume Indexes of Imports by Section, Seasonally Adjusted, Balance of Payments Basis

116 1.5 Total Exports by Commodity Grouping, Seasonally Adjusted, Balance of Payments Basis

118 1.6 Imports by Commodity Grouping, Seasonally Adjusted, Balance of Payments Basis

2. Merchandise Trade on a Customs Basis

120 2.1 Total Exports by Country, Not Seasonally Adjusted, Customs Basis

121 2.2 Imports by Country, Not Seasonally Adjusted, Customs Basis

122 2.3 Total Exports by Commodity Grouping, Not Seasonally Adjusted, Customs Basis

124 2.4 Imports by Commodity Grouping, Not Seasonally Adjusted, Customs Basis

[1] Total exports includes domestic exports and re-exports, for further information please refer to Summary of External Trade (65-001). [2] The figures reflect a number of adjustments applied to the customs totals to make them consistent with the concepts and definitions used in the system of national accounts. For more information about these adjustments, please refer to Quarterly Estimates of the Canadian Balance of International Payments (67-001). [3] For definition of major trading areas and sections, please refer to Summary of External Trade (65-001).

[1] Data for 1970 through 1972 refer to class 1 and 2 carriers whose gross annual revenues totalled $500,000 or more. Information for the period January 1973-December 1978 refers to only 6 major railways. Commencing January 1979, data for 7 major railways (accounting for 95 per cent or more of the total operating revenues) are shown

---

[1] Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month. [2] Daily averages for period. [3] Mainly deposits of foreign banks. [4] Capital, rest fund and undivided profits as at the latest fiscal year-end [5] Including issues payable in foreign currency. [6] Excluding Canadian day-to-day loans [7] Securities purchased direct from issuer with a term of less than one year at time of issue are classified as loans [8] Loans to finance purchase of Canada Savings Bonds at time of issue. [9] These series reflect the combination of two CANSIM series.

Statistics Canada   Statistique Canada

Data in Many Forms..

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

CANSIM Division

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-8200) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montreal	(283-5725)	Regina	(359-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(973-6586)	Vancouver	(666-3691)

Toll free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional references centres.

Newfoundland and Labrador	Zenith 0-7037
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192
Quebec	1-800-361-2831
Ontario	1-800-268-1151
Manitoba	1-800-282-8006
Saskatchewan	1(112)800-667-3524
Alberta	1-800-222-6400
British Columbia (South and Central)	112-800-663-1551
Yukon and Northern B.C. (area served by NorthwesTel Inc.)	Zenith 0-8913
Northwest Territories (area served by NorthwesTel Inc.)	Call collect 420-2011

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales, Statistics Canada, Ottawa, K1A 0T6.

Canadian Statistical Review

Data in this publication were retrieved from CANSIM† (Official Mark of Statistics Canada for its Canadian Socio-Economic Information Management System), and processed to create a photo-ready copy from which this publication was produced. CANSIM is the Statistics Canada computerized data bank; series published in this Review (as well as other data) are available on computer printouts, cards, tape or directly via terminal.

The identification numbers at the top of each column of data refer to the unadjusted and seasonally adjusted monthly or quarterly data in this column. Series maintained by Statistics Canada carry a "D" prefix (e.g. D 1375). The "B" prefix (e.g. B 1437) identifies series in CANSIM which are maintained by the Bank of Canada.

More details on which data is available can be found in the following:

CANSIM Main Base Series Directory, 1984 — $75.00 Canada, $90.00 other countries

The Directory includes an index which serves to identify, at a fairly aggregative level, the contents of the CANSIM database. This index provides a key to the Series Directory and is the first step in locating series from the CANSIM Main Base.

This Directory is a detailed guide to the data on the CANSIM Main Base. It gives the title, start date, source of the data, and other descriptive material.

CANSIM Mini Base Series Directory, Catalogue 12-569 — $45.00 Canada, $54.00 other countries

This Directory is a detailed guide to the data on the CANSIM Mini Base — a standard subset of data originating from the CANSIM Main Base which is available at various Secondary Distributors.

CANSIM-Cross Classified Data Base Index — $7

This index provides a summary of available data on the Cross Classified Data Base.

CANSIM-Cross Classified Data Base Directory — $20

This directory provides a detailed guide to the Cross Classified Data Base. It provides a description of the structure of each table.

The seasonal adjustment method applied to economic time series at Statistics Canada is a computerized ratio-to-moving average method. The standard computer program used is the Statistics Canada X-11-ARIMA seasonal adjustment method. Seasonal adjustment removes the effect of repetitive intra-year variations resulting from normal differences in weather, holidays with invariable dates, or other events which repeat with the same timing.

While seasonal adjustment allows a much better look at the underlying trend of a series, the adjusted series will contain irregular fluctuations. Small changes between months in the adjusted series may simply be erratic movements and, to obtain a clearer idea of the underlying trend, users should examine the adjusted series over a number of months. The MCD, or Months for Cyclical Dominance, in a table containing seasonally adjusted series, indicates the smallest span of months for which the average percent change without regard to sign in the trend cycle is greater than that in the irregular factor. For the smoothest series in MCD is 1, for the most erratic series it is 6. Applying a moving average of the period equal to the MCD tends to smooth irregular movements which may obscure the underlying trend.

Editorial Board

This publication is produced under the guidance of the Canadian Statistical Review Editorial Board, composed of the following members:

J.S. Wells (Acting Chairman) — Assistant Chief Statistician, National Accounts and Analytical Services Field
R.E. Drover — Director, Transportation Division
B.J. Lynch — Director General, Operations Branch
E. Boyko — Director, Electronic Data Dissemination Division
G.J. Brackstone — Director General, Methodology Branch
A. Meguerditchian — Director, International and Financial Economics Division
L.O. Stone — Director, Population Studies Division
P.N. Triandafillou — Director, Agriculture/Natural Resources Division
K. Lal — Director General, System of National Accounts Branch
D. Bergeron — Editor, Canadian Statistical Review

Inquiries about the contents of the Canadian Statistical Review should be directed to the editor at: CANSIM Division, 9th Floor, R.H. Coats Bldg., Tunney's Pasture, Ottawa, Ontario, K1A 0T6.

Subscriptions

The *Canadian Statistical Review* and other catalogued publications of Statistics Canada, may be ordered from Publication Sales and Services, Statistics Canada, Ottawa, K1A 0T6 and remittances made payable to the Receiver General for Canada.

Correspondence should be directed to the *Canadian Statistical Review* CANSIM Division, Statistics Canada. R.H. Coats Tower, Ottawa, Ontario, K1A 0T6.

---

[1] In general the term filtering refers to removing, or filtering out, movements of the data that repeat themselves with roughly the same frequency. [2] Composite Index of Housing Starts (units), Building Permits (dollars), and Mortgage Loan Approvals (number). [3] Deflated by the Consumer Price Index. [4] Toronto Stock Exchange (300 Stock Index excluding oil and gas component).

---

[1] The occupational status of the majority of the persons destined to the labour force is determined by immigration officials by an examination of documentary evidence provided by the immigrants. The classification of occupations is similar to that used in the 1971 Census; see Occupational Classification Manual, Census of Canada, 1971, Catalogue Number 12-536E, Vol. I. [2] Beginning with 1978, this is subdivided into entrepreneurs and managers-administrators. For breakdown refer to CANSIM main base. [3] Includes logging, fishing, trapping and hunting. [4] Includes mechanical and construction. [5] Includes a small number in non-specified occupations. [6] Beginning with 1978 includes fiancés and fiancées. [7] Does not include students entering Canada on students' visas. [8] Includes also retired persons, elderly dependents, and other unspecified persons.

Section 3 ▪ System of National Accounts

1. Income and Expenditure Accounts

18 1.1 Gross Domestic Product, Income Based
18 1.2 Gross Domestic Product, Expenditure Based
19 1.3 Gross Domestic Product at 1981 Prices, Expenditure Based
19 1.4 Relation Between Gross Domestic Product at Market Prices, Gross National Product at Market Prices, and Net National Income at Factor Cost
20 1.5 Sources and Disposition of Gross Saving
20 1.6 Sources and Disposition of Personal Income
21 1.7 Personal Expenditure on Consumer Goods and Services by Type of Expenditure
22 1.8 Personal Expenditure on Consumer Goods and Services by Type of Expenditure, at 1981 Prices
22 1.9 Government Sector Revenue and Expenditure
23 1.10 Federal Government Revenue and Expenditure
24 1.11 Provincial Government Revenue and Expenditure
25 1.12 Local Government Revenue and Expenditure
26 1.13 Hospital Revenue and Expenditure
26 1.14 Canada and Quebec Pension Plan Revenue and Expenditure
27 1.15 Implicit Price Indexes, Gross Domestic Product, (1981-100). Seasonally Adjusted at Annual Rates

2. Domestic Product by Industry at Factor Cost

28 2.1 Gross Domestic Product by Industry at Factor Cost in 1981 prices, Quarterly
30 2.2 Gross Domestic Product by Industry at Factor Cost in 1981 Prices, Monthly

3. Balance of International Payments

37 3.1 Canadian Balance of International Payments, Current Account, All Countries
38 3.2 Canadian Balance of International Payments, Current Account, Area Distribution
39 3.3 Canadian Balance of International Payments, Capital Account, All Countries

Table 1. Income and expenditure accounts

Table 1.1: Gross domestic product, income based (millions of current dollars).

Year and quarter	Wages, salaries, and supplementary labour income[1]	Corporation profits before taxes[2]	Interest & misc. investment income[2,3]	Accr'd net income of farm operators from farm prod.[4]	Net income of non-farm unincorp. business incl. rent	Inventory valuation adjustment[5]	Net domestic income at factor cost	Indirect taxes less subsidies	Capital consumption allowances	Statistical discrepancy	Gross domestic product at market prices

---

[1] Includes military pay and allowances. [2] These aggregates differ from those shown in earlier publications in that they are on a "domestic" basis and thus include interest and dividends paid to non-residents and exclude interest and dividends received from non-residents. [3] Includes profits (net of losses) of government business enterprises and other government investment income. [4] Includes value of physical change in farm inventories. An adjustment has been made to take account of the accrued earnings of farm operators arising out of the operations of the Canadian Wheat Board. Book value of inventories is deflated to remove the effect of price changes and the derived physical change is then valued at average prices of the current period to obtain the value of physical change. The difference between this value of physical change and the change in book value is called the inventory valuation adjustment. [5] See footnote 3, Table 1.2.

---

[1] Includes outlay on new durable assets such as building and highway construction by governments other than government business enterprises. Excludes defence construction and equipment which is defined as current expenditure. [2] Includes capital expenditures by private and government business enterprises, private non-commercial institutions and outlays on new residential construction by individuals. Capital expenditure is defined to include all transfer costs on the sales and purchases of existing fixed assets. [3] The book value of inventories is deflated to remove the effect of price change and the derived "physical" change is then valued at average prices of the current period to obtain the value of physical change. The difference between the value of physical change and the change in book value is called the inventory valuation adjustment (shown in Table 1.1). [4] See footnote 4, Table 1.1. [5] Excludes investment income received from non-residents. [6] Excludes investment income paid to non-residents.

[1] The period 1961-1986 was deflated in three time periods 1961-1971; 1971-1981, 1981-1986 with price indexes based on 1961, 1971 and 1981 respectively. The prices were then linked arithmetically at the major group, component and total levels to the 1981 base. The linking process produced residual differences between the sum of the linked groups and linked aggregates. These differences are shown as adjusting entries. [2] Excludes investment income received from non-residents. [3] Excludes investment income paid to non-residents.

---

[1] The quarterly figures of real property taxes unadjusted and seasonally adjusted are obtained by dividing annual totals by four. Since real property tax rates have been generally upward, this treatment gives rise to a fictitious seasonal between the fourth and first quarters in the seasonally adjusted tax series. [2] Includes capital consumption allowances. [3] Includes net purchase of existing non-financial assets.

---

[1] These implicit price indexes derived by dividing the value figures in current dollars by the constant dollar figures, are current weighted price indexes. They reflect not only pure price changes, but also changing expenditure patterns within and between major groups. Quarter-to-quarter comparisons based on the seasonally adjusted data are less subject to the problem of shifting weights than are similar comparisons based on data for seasonality and therefore may be used as indicators of price changes. [2] Excludes investment income received from non-residents. [3] Excludes investment income paid to non-residents.

---

[1] The labour force as a percentage of the population 15 years of age and over. The participation rate for a particular group (age, sex etc.) is the labour force in that group expressed as a percentage of the population for that group. [2] The unemployed as a percentage of the labour force. The unemployment rate for a particular group (age, sex etc.) is the unemployed in that group expressed as a percentage of the labour force for that group. Seasonally-adjusted rates are calculated by dividing seasonally-adjusted unemployment by the sum of seasonally-adjusted employment and seasonally-adjusted unemployment (i.e. seasonally-adjusted labour force by summation).

Note: Excludes inmates of institutions, members of the armed services, Indians living on reserves and residents of the Yukon and Northwest Territories. The estimates are derived from a sample survey and are subject to sampling error. In general, the smaller the estimate, the larger is the relative sampling error. For other explanatory material see notes at the end of Catalogue No. 71-001.

Source: The Labour Force (71-001), monthly.

---

[1] The number of persons covered by unemployment insurance is an estimate comprising armed forces personnel, beneficiaries and paid workers from the Labour Force Survey. [2] Claimants who receive benefits through the Commission's computer pay system during the reference week. [3] Benefits paid for adoption, training, work sharing and job creation claims are included in the total benefits paid. [4] Annual figures are 12-month averages.

[1] Statistics on work stoppages include all strikes and lockouts whether legal or illegal, which last for one-half day or more and amount to 10 or more person-days of time lost Time lost by workers indirectly affected, such as those laid off because of a work stoppage by other employees, is not included. Data is published 45 days after the end of reference month.
[2] The industry groups from January 1976 forward, are based on the 1970 Standard Industrial Classification. [3] The number of person-days is calculated by multiplying the number of workers involved in a work-stoppage by the number of normal working days during the stoppage. Adjustments are made for establishments on shift work, etc. [4] The total includes all work stoppages. The agriculture, finance, insurance and real estate and public administration and defence industries are not shown separately. Should strikes occur in these industries, the time lost also will be shown in the total. [5] Includes publishing and allied industries. [6] Includes storage and communication industries.

[1] These weights, provided as a general guide, show the relative importance of the major components of the C.P.I. They are based on expenditure values derived from quantities and prices of year 1982. [2] Includes water, fuel and electricity, and traveller accommodation. [3] Excludes water, fuel and electricity

* "For further information on the weights and methodology associated with the Consumer Price Index, see "The Consumer Price Index Reference Paper, updating based on 1982 expenditures," cat. 62-553, occasional.

Section 6 ▪ Manufacturing

74 1. Total Inventories, Shipments and Orders in Manufacturing
75 2. Manufacturing Shipments by Industry
77 3. Manufacturing Inventories by Industry
79 4. Estimated Value of Shipments and Unfilled Orders by Economic Use Classification
80 5. Estimated Value of Inventories Owned and Raw Materials by Economic Use Classification
81 6. Estimated Value of Goods in Process and finished Products by Economic Use Classification
82 7. Tobacco and Beverages
83 9. Footwear
84 10. Production of Sawn Lumber
84 11. Pulpwood, Wood Pulp and Newsprint
85 12. Primary Iron and Steel
86 13. New Motor Vehicles
87 14. Production of Motor Vehicles in Canada
88 15. Refrigerators, Freezers, Washing Machines and Clothes Dryers

Table 1: Total inventories, shipments and orders in manufacturing based on the 1980 standard industrial classification (million dollars)[1]. Projected from 1982 Census of Manufactures benchmark.

				Inventory at end of month						
						All inventory held				
Year and month	Shipments[2]	New orders received during month[3]	Unfilled orders at end of month	Owned[4]	Held but not owned	Total	Raw materials	Goods in process	Finished goods	Ratio of inventories owned to shipments

[1] Estimates of manufacturers' shipments, inventories and orders are based on a monthly survey ol a sample of manufacturing establishments, benchmarked to the annual census of manufacturers. [2] Shipments of goods manufactured within the establishments. [3] Total new orders received during the period at estimated selling value, net of cancellations. [4] Total manufacturing inventory owned by manufacturing establishments. Other inventory such as that of goods purchased for resale is not included.

Note: All series are subject to revision each year when more recent Census of Manufactures data become available.

Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), Statistics Canada.

Table 2: Manufacturing shipments[1] by industry based on the 1980 standard industrial classification (million dollars). Projected from 1982 Census of Manufactures benchmark.

Year and month	Total shipments	Non-durable goods industries											
		Total	Food	Beverage	Tobacco products	Rubber products	Plastics products	Leather and allied products	Primary textile	Textile products	Clothing	Paper and allied products	Printing publishing and allied

[1] Estimates of manufacturers' shipments are based on a monthly survey of a sample of manufacturing establishments benchmarked to the annual Census of Manufactures.
Note: All series are subject to revision each year when more recent Census of Manufactures data become available.
Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), Statistics Canada.

Table 3: Manufacturing inventories[1] by industry based on the 1980 standard industrial classification (million dollars). Projected from 1982 Census of Manufactures benchmark.

End of period and month	Total inventories owned	Non-durable goods industries											
		Total	Food	Beverage	Tobacco products	Rubber products	Plastics products	Leather and allied products	Primary textile	Textile products	Clothing	Paper and allied products	Printing publishing and allied

---

[1] Separate industries series combined for the Supplementary Classification automotive products, are also components of other classifications. Other economic use classification groups are mutually exclusive and except for rounding differences add to relevant Canada totals in section 6, table 1.

Note: All series are subject to revision each year when more recent Census of Manufactures data become available.

Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), Statistics Canada.

Table 5: Estimated value of inventories owned and raw materials in manufacturing industries, by economic use classification, based on the 1980 standard industrial classification (million dollars). Projected from 1982 Census of Manufactures benchmark.

	Inventories owned				Inventories held: Total			Inventories held: raw materials						
	Consumer goods							Consumer goods						
End of period and month	Non-durable and semi-durable	Capital goods	Construction materials and components	Supplementary classification: automotive products	Consumer goods: Durable	Intermediate goods and supplies	Export-oriented industries	Non-durable and semi-durable	Durable	Capital goods	Construction materials and components	Intermediate goods and supplies	Export-oriented industries	Supplementary classification: automotive products

---

[1] Pulpwood produced for domestic use and excluding exports, but including receipts of purchased roundwood. [2] Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp. [3] Customs exports. [4] Mill shipments destined for export.

---

[1] Data compiled according to the Steel Distribution Index revised January, 1964. [2] Figures on net shipments relate to semi finished and rolled steel products only Shipments to consuming industries of castings, forgings and steel pipe are not included. [3] Excluding shipments for re-processing at maker's own plant. [4] Data compiled as submitted by the steel producers according to the steel industry distribution code.

---

[1] Gas types are included. [2] Includes producers' shipments for export. [3] In some cases these shipments are not at the factory level, and stocks at beginning of month plus production less shipments do not equal stocks at end of month. [4] End of period. [5] Electric and other. [6] Excludes apartment type machines. [7] Excludes other than electric.

Note: Components may not add to totals due to rounding. Current figures in this table are preliminary and therefore subject to revision.

[1] Supply and disposition for both Crude Oil and Natural Gas will not agree because of losses, inventory changes, pipeline fuel used etc.

[2] Includes crude oil, condensate and pentanes plus.

[1] Includes domestic and imported crude oil, condensate and pentanes plus received by Canadian refineries. [2] Refinery production (from crude oil, condensate and pentanes plus, and commingled propane/butane mixes) plus other materials used. [3] Includes stove oil, kerosene. [4] Includes aviation gasoline and aviation turbo fuel. [5] Includes propane and propane mixes and butane and butane mixes. [6] Includes petro-chemical feed stocks, naphtha specialties, coke, lubricating oil and grease, still gas and other products.

---

[1] A dwelling unit is defined as a structurally separate set of living quarters having its own entrance from outside of the building, or from a common passage inside. These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All metropolitan areas and urban centres with a population of 10,000 or more, along with certain other areas of high building activity, are enumerated completely each month. The remainder of the country is covered on a sample basis quarterly.

[1] Price indexes of inputs measure only changes in prices of units of inputs. They do not reflect other important changes in costs of production, such as changing quantities and productivity of inputs. They should not be interpreted, therefore, as equivalent to indexes of cost per unit of input. Direct comparison of them with price indexes of output can yield misleading indications of the changing relationship of costs and income. The price indexes for the last two years are subject to revision. [2] The major groups include additional components than the selected ones shown.

Section 11 ▪ External Trade

1. Merchandise Trade on a Balance of Payments Basis

114 1.1 Total Exports by Major Trading Area and Section, Seasonally Adjusted, Balance of Payments Basis
114 1.2 Imports by Major Trading Area and Section, Seasonally Adjusted, Balance of Payments Basis
115 1.3 Price and Volume Indexes of Total Exports by Section, Seasonally Adjusted, Balance of Payments Basis
115 1.4 Price and Volume Indexes of Imports by Section, Seasonally Adjusted, Balance of Payments Basis
116 1.5 Total Exports by Commodity Grouping, Seasonally Adjusted, Balance of Payments Basis
118 1.6 Imports by Commodity Grouping, Seasonally Adjusted, Balance of Payments Basis

2. Merchandise Trade on a Customs Basis

120 2.1 Total Exports by Country, Not Seasonally Adjusted, Customs Basis
121 2.2 Imports by Country, Not Seasonally Adjusted, Customs Basis
122 2.3 Total Exports by Commodity Grouping, Not Seasonally Adjusted, Customs Basis
124 2.4 Imports by Commodity Grouping, Not Seasonally Adjusted, Customs Basis

1—Merchandise trade on a balance of payments basis

[1] Total exports includes domestic exports and re-exports, for further information please refer to Summary of External Trade (65-001). [2] The figures reflect a number of adjustments applied to the customs totals to make them consistent with the concepts and definitions used in the system of national accounts. For more information about these adjustments, please refer to Quarterly Estimates of the Canadian Balance of International Payments (67-001). [3] For definition of major trading areas and sections, please refer to Summary of External Trade (65-001).

[1] Data for 1970 through 1972 refer to class 1 and 2 carriers whose gross annual revenues totalled $500,000 or more. Information for the period January 1973-December 1978 refers to only 6 major railways. Commencing January 1979, data for 7 major railways (accounting for 95 per cent or more of the total operating revenues) are shown.

---

[1] Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month. [2] Daily averages for period. [3] Mainly deposits of foreign banks. [4] Capital, rest fund and undivided profits as at the latest fiscal year-end. [5] Including issues payable in foreign currency. [6] Excluding Canadian day-to-day loans. [7] Securities purchased direct from issuer with a term of less than one year at time of issue are classified as loans. [8] Loans to finance purchase of Canada Savings Bonds at time of issue. [9] These series reflect the combination of two CANSIM series.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Electronic Data Dissemination Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-8200) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(780-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(973-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

Newfoundland and Labrador	1-800-563-4255
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192
Quebec	1-800-361-2831
Ontario	1-800-268-1151
Manitoba	1-800-282-8006
Saskatchewan	1-800-667-7164
Alberta	1-800-222-6400
British Columbia (South and Central)	1-800-663-1551
Yukon and Northern B.C. (area served by NorthwesTel Inc.)	Zenith 0-8913
Northwest Territories (area served by NorthwesTel Inc.)	Call collect 403-420-2011

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales, Statistics Canada, Ottawa, K1A 0T6.

Canadian Statistical Review

Data in this publication were retrieved from CANSIM† (Official Mark of Statistics Canada for its Canadian Socio-Economic Information Management System), and processed to create a photo-ready copy from which this publication was produced. CANSIM is the Statistics Canada computerized data bank; series published in this Review (as well as other data) are available on computer printouts, cards, tape or directly via terminal.

The identification numbers at the top of each column of data refer to the unadjusted and seasonally adjusted monthly or quarterly data in this column. Series maintained by Statistics Canada carry a "D" prefix (e.g. D 1375). The "B" prefix (e.g. B 1437) identifies series in CANSIM which are maintained by the Bank of Canada.

More details on which data is available can be found in the following:

CANSIM Main Base Series Directory, 1987 — $100.00 Canada, $120.00 other countries

This Directory is an essential instrument for any regular user of the CANSIM Main Base.

The Directory includes:

a full list of series on the Base, with both matrix /series and databank identifiers,

an alphabetical subject index with corresponding matrix numbers,

a list of subject matter contacts,

and much other useful information.

A subscription to the 1987 Directory includes notification of any changes to the Base, on a quarterly basis.

Another valuable tool for CANSIM users is the 1987 CANSIM Main Base Cross Reference between Databank Identifiers and Matrix and Series Numbers — $25.00 Canada, $30.00 other countries.

CANSIM Mini Base Series Directory, Catalogue 12-569 — $45.00 Canada, $54.00 other countries

This Directory is a detailed guide to the data on the CANSIM Mini Base — a standard subset of data originating from the CANSIM Main Base which is available at various Secondary Distributors.

CANSIM-Cross Classified Data Base Index — $7

This index provides a summary of available data on the Cross Classified Data Base.

CANSIM-Cross Classified Data Base Directory — $20

This directory provides a detailed guide to the Cross Classified Data Base. It provides a descriptior of the structure of each table.

The seasonal adjustment method applied to economic time series at Statistics Canada is a computerized ratio-to-moving average method. The standard computer program used is the Statistics Canada X-11-ARIMA seasonal adjustment method. Seasonal adjustment removes the effect of repetitive intra-year variations resulting from normal differences in weather, holidays with invariable dates, or other events which repeat with the same timing.

While seasonal adjustment allows a much better look at the underlying trend of a series, the adjustec series will contain irregular fluctuations. Small changes between months in the adjusted series may simply be erratic movements and, to obtain a clearer idea of the underlying trend, users should examine the adjusted series over a number of months. The MCD, or Months for Cyclical Dominance, in a table containing seasonally adjusted series, indicates the smallest span of months for which the average percent change without regard to sign in the trend cycle is greater than that in the irregular factor. For the smoothest series in MCD is 1, for the most erratic series it is 6. Applying a moving average of the period equal to the MCD tends to smooth irregular movements which may obscure the underlying trend.

Editorial Board

This publication is produced under the guidance of the Canadian Statistical Review Editorial Board, composed of the following members:

J.S. Wells (Acting Chairman) — Assistant Chief Statistician, National Accounts and Analytical Services Field
R.E. Drover — Director, Transportation Division
B.J. Lynch — Director General, Operations Branch
E. Boyko — Director, Electronic Data Dissemination Division
G.J. Brackstone — Director General, Methodology Branch
A. Meguerditchian — Director, International and Financial Economics Division
L.O. Stone — Director, Population Studies Division
P.N. Triandafillou — Director, Agriculture/Natural Resources Division
K. Lal — Director General, System of National Accounts Branch
D. Bergeron — Editor, Canadian Statistical Review

Inquiries about the contents of the Canadian Statistical Review should be directed to the editor at: Electronic Data Dissemination Division, 9th Floor, R.H. Coats Bldg., Tunney's Pasture, Ottawa, Ontario, K1A 0T6.

Subscriptions

The *Canadian Statistical Review* and other catalogued publications of Statistics Canada, may be ordered from Publication Sales and Services, Statistics Canada, Ottawa, K1A 0T6 and remittances made payable to the Receiver General for Canada.

Correspondence should be directed to the *Canadian Statistical Review* Electronic Data Dissemination Division, Statistics Canada. R.H. Coats Tower, Ottawa, Ontario, K1A 0T6.

Note to Users

This section is used to announce changes in tables of the *Canadian Statistical Review* and in related CANSIM series.

Monthly or quarterly data may not add to totals due to rounding.

Gross Domestic Product

Preliminary Annual and Fourth Quarter 1986

In 1986, Gross Domestic Product, at 1981 prices, expanded by 3.1%, compared to an average rate of about 4% in the previous three years of the current expansion. Growth occurred largely in the first half of the year with marginal increases in the second half of the year.

The gain in real GDP reflected growth of about 3% in both final domestic demand and in exports. There was considerable divergence in the growth trends by component, however, partly reflecting large declines in energy and other resource prices during the year. While consumer spending and housing demand posted solid gains in 1986, business investment in plant and equipment flattened out. Exports grew less rapidly than imports, while lower prices received for merchandise exports were a major factor in reducing the overall rate of price increase in GDP to 2.8%, the lowest in over 20 years.

In terms of industry output, growth in 1986 was led by services, up 4.3%. Production of goods was up 1.6%, with output sluggish in mining and manufacturing for much of the year.

Components of Demand

The volume of personal expenditure on goods and service rose by 4.0%, compared to 5.0% in 1985. Spending on services rose 4.6%, in contrast with a 3.5% increase for goods. The strength in services was partly related to the large increase of tourism in Canada associated with Expo '86. The slower growth in expenditure on goods largely originated in automotive products, up 3.1%, following three years of growth of well over 10% per year. The solid growth in housing demand was reflected in higher purchases of furniture and appliances, while semi-durable goods posted a 5.4% gain. Slow growth in energy demand served to restrain the increase in non-durable goods to 1.6%.

Residential construction rose by 13.2% in volume, comparable to the gain in 1985. Most of the increased house building activity occurred in Ontario and Quebec, and was accompanied by a sharp increase in house prices.

Business investment in plant and equipment, in real terms, fell 0.8% following a 4% gain in 1985. A sharp cutback in non-residential construction was largely offset by a 5.4% increase in machinery and equipment. The drop in non-residential construction was particularly severe in the energy sector, at a time of declining oil prices. Increased investment in the manufacturing and services industries was most evident in central Canada.

At $2.2 billion, the volume of non-farm business inventory accumulation was little changed in 1986. An acceleration in stockpiling in the first quarter of the year, notably in the trade sector, was followed by progressively more restraint during the year. At year-end, the ratio of non-farm inventories to final sales was little changed from a year ago.

Net exports of goods and services, at 1981 prices declined $1.5 billion, with all of the drop taking place in merchandise trade. A 6.0% increase in the volume of merchandise imports was widespread across commodities. The largest gains occurred in crude petroleum and some components of imported machinery and equipment. The weakness in export volume, up only 2.6%, was most evident in slack demand for wheat and natural gas.

The rise of 2.8% in the implicit price index for GDP reflected a 2.2% drop in prices received for exports of goods, particularly for energy products and a range of agricultural and mineral products. The implicit price index for final domestic demand rose by about 4% for the third consecutive year.

Components of Income

Total labour income rose by 5.7% in 1986. Wages and salaries in the services-producing industries rose 6.1%. Weak employment limited wage and salary growth in goods-producing industries to 4.3%. Personal income rose 6.9% for the year. Increased income taxes restrained the growth in disposable incomes to 5.4%; together with the gain in spending, the personal savings rate fell from 13.6% in 1985 to 11.3% in 1986.

Corporate profits before taxes declined by 4.9% in 1986, reversing an increase of similar magnitude in 1985. The decrease largely originated in mineral fuel and petroleum industries, which were affected by lower crude oil prices.

The total government sector deficit, on a national accounts basis, narrowed from $31.3 billion in 1985 to $27.3 billion in 1986. Total revenues of all levels of government combined rose 7.0%, largely due to higher rates of personal direct taxes and indirect taxes. The growth in total expenditures slowed noticeably, to 4.2% compared to 7.5% in 1985. There were lower rates of growth in interest payments on the public debt and outlays for goods and services. Subsidy and capital assistance payments declined in the year, mainly reflecting the termination of a number of petroleum-related programs.

Fourth Quarter 1986

Real expenditure on GDP rose only fractionally in the fourth quarter as increased final domestic and export demand was largely supplied from inventories. Final domestic demand grew by 0.6%, after a 1.0% gain in the third quarter, as a slowdown in consumer demand was partly offset by increased fixed capital investment. In particular, housing demand grew steadily, while business investment in plant and equipment turned up after a slump in the second and third quarters.

In terms of output by industry, the fourth quarter gain originated in goods-producing industries, as output of services-producing industries declined for the first quarter this year. There were widespread gains in the goods-producing industries, following slight declines in the previous two quarters.

The volume of personal expenditure on goods and services rose 0.2% in the fourth quarter, following two quarters of strong increases. A 2.5% decline in outlays on durable goods was accounted for by lower spending on automobiles, which had risen sharply in the third quarter when temporary incentives to purchase proliferated.

Business investment in plant and equipment rose 0.8% in volume, to partly reverse the cumulative drop of 5.8% in the previous two quarters. The firming of investment was most evident in exploration and development of oil and gas which led to a 1.1% rebound in non-residential construction. Special provincial government incentives in Alberta to invest before year-end contributed to this gain. Outlays for machinery and equipment continued to rise moderately. Residential construction rose by 4.2% in volume, after a similar gain in the third quarter with all of the increase originating in new construction.

Real business inventories declined by $1.1 billion, after a $3.4 billion increase in the third quarter. The decline originated in agriculture, manufacturing and trade. The easing of inventory accumulation in the second half of the year accompanied increased domestic and export demand, and followed a large accumulation of stocks early in the year.

Net exports of goods and services rose nearly $2.1 billion in volume in the fourth quarter, to their highest level in over a year. This largely reflected increased export volume, up 3% in total for the second consecutive quarter. Exports of merchandise strengthened mainly as a result of higher grain shipments — which were held in inventory by labour disputes in the third quarter — as well as shipments of motor vehicle products. The volume of import demand grew by 1.6% in total.

Total labour income grew by 1.1% in the fourth quarter, as the result of gains in both the goods-producing (0.6%) and services-producing (1.4%) industries. Personal disposable income rose by 1.8%, after two quarters of weak growth. The personal savings rate was little changed at 10.2% in the quarter.

Available on CANSIM: matrices 6701-6741, 6641-6642.

A printout containing all tables is also available on the day of release from the Income and Expenditure Accounts Division ($35/$140).

Real Gross Domestic Product at Factor Cost, by Industry

(seasonally adjusted data)
December 1986

Monthly Overview

Gross Domestic Product at factor cost, in 1981 prices, increased 1.2% in December, following declines in November and October. The December increase was the largest gain recorded since a 1.8% increase in April 1986 and marked the only time in 1986 that GDP surpassed its April level. It now stands 2.1% above the level of December 1985. Output of goods-producing industries increased 1.6% in December, while services-producing industries advanced 1.0%.

Goods-producing Industries

Goods-producing industries accounted for half the December gain in economic activity, with virtually all of this growth occurring in manufacturing and mining industries. Approximately 60% of the manufacturing increase originated from producers of wood products, paper products and transportation equipment. The December output increases recorded by these industries coincided with substantially higher exports of lumber, newsprint, motor vehicles, and motor vehicle parts. The increased production and exports of wood products followed the end of the B.C. woodworkers strike and preceded the anticipated implementation of the export tax on lumber in January 1987. Manufacturers of food and beverage products also reported significant production increases in December. In mining, about 90% of the gain was due to industries involved in the extraction, exploration and development of mineral fuels. Construction, agriculture, and utilities industries reported output declines during the month.

Services-producing Industries

Output gains were widespread among services-producing industries, with virtually all industry groups showing growth. Following consecutive monthly decreases of 1.4% in October and 1.5% in November, output of the finance, insurance and real estate industry increased 1.4% in December. In wholesale trade, substantial output gains were recorded by wholesalers of food, paper, lumber and automotive products. Output of the transportation and storage industry increased substantially for the second consecutive month, mainly due to advances in railway, water, and truck transport, as well as increased storage activity. Much of the gain in the railway transport and storage industries was due to increased throughput of grain products following the end of a labour dispute which had disrupted operations at Thunder Bay grain elevators until mid-October. Exports of grain products increased substantially in both November and December. Retail trade increased 0.6% during December mostly due to gains by motor vehicle dealers and food stores.

Canadian Balance of International Payments

Fourth Quarter 1986 and Annual 1986

Fourth Quarter 1986

Current account transactions, on a seasonally adjusted basis, produced a large deficit, as in each of the previous three quarters. During the current quarter, an increase recorded in the merchandise trade surplus was largely attributable to the automotive sector which had been weak throughout much of 1986. However, the increase in the merchandise surplus was more than offset by higher deficits on the services and investment income accounts.

Among capital transactions, which are not seasonally adjusted, bond borrowings abroad reached a new record, with Japan continuing to be a major investor. Record inflows of foreign direct investment in Canada in the fourth quarter were more than offset by a repatriation of funds by a foreign company in the petroleum sector. Canadian residents stepped up both their foreign direct and portfolio investments abroad; this gave rise to larger net outflows than in the previous quarter.

Current Account, Seasonally Adjusted

The main quarterly features were:

- A current account deficit of $2.3 billion, compared to $1.9 billion in the previous quarter. The increase of $565 million in the merchandise trade surplus to $2.8 billion was more than offset by an increase of $896 million in the deficit on non-merchandise transactions to $5.0 billion;

- An increase of 4% ($1.3 billion) in merchandise exports, almost double the advance of the previous quarter; this contrasted with declines in the first half of the year. Increases in the current quarter were recorded for passenger cars, wheat, steel bars and ores. Decreases were recorded in trucks and tractors, lumber and coal;

- An increase of 2.6% ($715 million) in imports, down from a 4.6% advance in the previous quarter. Higher imports were recorded in office machines and other equipment, crude petroleum, coal and aircraft. Decreases were recorded in petroleum and coal products and in metal in ores;

- A surplus of $532 million in the automotive sector following a virtual balance in the previous quarter. The surplus for the year was, however, at its lowest level since 1982;

- Among non-merchandise transactions, a return to a deficit on travel which amounted to $395 million. This deficit arose from both lower receipts and higher payments in contrast to the previous two quarters which were largely affected by Expo 86;

- An increase of $1.0 billion in the deficit on the investment income account to $4.6 billion. This increase was attributable to dividends where both higher payments and lower receipts were recorded;

- A sharp increase of $509 million in net transfer receipts to $613 million due to unusually large receipts of withholding taxes.

Current and Capital Accounts
(Not Seasonally Adjusted)

The main quarterly features were:

- A deficit of $1.7 billion in the current account compared to a virtual balance in the fourth quarter of 1985. This increase stemmed largely from merchandise trade transactions where the surplus was sharply reduced;
- Among liabilities to non-residents, a record net inflow of $8.3 billion from transactions in Canadian bonds, compared to $5.8 billion in the previous quarter. The bulk of the increase represented foreign investment in the secondary market, particularly Japanese purchases of Government of Canada bonds;
- A net outflow of over $800 million from foreign direct investment in Canada, representing a shift of $2.1 billion from the previous quarter's net inflow. As in the previous quarter, there were very large inflows from foreign investors. However, in the current quarter, these were more than offset by an exceptionally large repatriation of funds by a foreign oil company, related to a restructuring of its Canadian operations;
- Among claims on non-residents, a record net outflow of $1.4 billion for Canadian portfolio investments abroad, $857 million in stocks and $512 million in bonds. While most of the net Canadian investment in bonds was in United States issues, about half of the net investment in stocks was channelled into the United Kingdom to purchase overseas stocks;
- An increase of $1.2 billion in reserve assets compared to a decline of $442 million in the previous quarter. Part of the increase was funded from abroad through Canada bills. This instrument, denominated in United States dollars, was introduced by the Government of Canada in October 1986;
- A statistical discrepancy (the balancing item between the recorded estimates of current and capital accounts) equivalent to a net debit of $3.1 billion;
- A stable Canadian dollar against the United States dollar, averaging 72 U.S. cents for the quarter. The Canadian dollar appreciated, however, against the pound sterling and the Japanese yen.

Year 1986

Current account transactions produced the largest deficit on record. (Viewed, however, against the size of the economy as measured by GDP, relatively larger deficits have been experienced in earlier years.) The 1986 deficit followed a relatively small deficit in 1985 and surpluses in the previous four years. The sharp increase in the deficit originated from merchandise trade transactions where imports continued to advance strongly whereas exports were virtually unchanged. As a result, the merchandise trade surplus was at its lowest level in the last five years. In non-merchandise transactions, a large increase in the deficit on investment income was substantially offset by a much lower deficit on travel, largely attributable to Expo 86.

Among capital transactions, record bond borrowings abroad more than doubled the 1985 net inflow. Japanese residents, who steadily increased their holdings of Canadian bonds in recent years, accounted for 40% of the 1986 net inflow. On foreign direct investment in Canada, a shift to a net inflow was largely explained by additional investment from overseas countries. The net outflow to the United States reflected a massive repatriation of funds by a foreign oil company in the fourth quarter. In Canadian claims abroad, Canadian direct investment abroad continued to generate a substantial outflow. There was also a notable increase in Canadian investment in foreign stocks, which resulted in a record net outflow.

Current Account

The main annual features were:

- A record current account deficit of $8.8 billion. The increase from the previous year's deficit of $0.6 billion was overwhelmingly due to the sharp decline ($7.3 billion) in the merchandise trade surplus to $10.1 billion. There was also an increase of $0.9 billion in the non-merchandise deficit to $18.9 billion;
- A substantial increase of $7.7 billion (7.5%) in merchandise imports although high, was much lower than the sharp advances of recent years. Higher imports were recorded in machinery and equipment, industrial goods and materials, and automotive products. The only major decline was in imports of crude petroleum, which was attributable to a sharp drop in prices as volume increased;
- An increase of $372 million (0.3%) in merchan-

dise exports. Underlying this small increase was a sharp drop of $5.2 billion for energy products, offset by widespread increases in other commodities;

- Among non-merchandise transactions, an increase of $2.2 billion in the deficit on the investment income account to $16.8 billion. Interest payments increased sharply as a result of record bond borrowings from abroad. Payments of dividends were also larger, specifically in the oil sector. Receipts of dividends declined from the unusually high levels of the previous two years;

- In international travel, a halving of the deficit to $1.1 billion, the lowest deficit since 1979. The decline in the deficit was related to Expo 86 which generated higher receipts from abroad and likely slowed down the growth of travel abroad by Canadians;

Capital Account

- A record net inflow of $23.1 billion from bond borrowings abroad, more than doubling the net inflow of 1985. The net investment came from overseas countries. Japan, which had steadily increased its holdings of Canadian bonds in recent years, purchased a record $9.5 billion in 1986. There were also very large purchases by other overseas countries which could be related to a combination of relatively high Canadian interest rates and a lower external value of the Canadian dollar;

- A record net inflow of $2.5 billion from foreign investment in the Canadian money market, in contrast to a net disinvestment of some $600 million in 1985. The bulk of the investment came from the United States, and was largely channelled into Government of Canada paper;

- A net inflow of $1.6 billion from foreign direct investment in Canada, a shift from the net outflow of $3.0 billion in 1985. Foreign investments in Canada, as measured by gross inflows, reached a record level in 1986. There was, however, a large outflow in the fourth quarter as a foreign oil company repatriated a large amount of funds as it reorganized its operations in Canada;

- A net outflow of $4.8 billion on account of Canadian direct investment abroad, in line with large net investments recorded in recent years. In the current year, there was a surge of takeover activities and a sharp rise of investment by the service sector, in contrast with 1985 when the manufacturing and the petroleum sectors predominated;

- A substantial increase in Canadian investment in foreign stocks, resulting in a record net outflow of $2.1 billion. About half went to the United Kingdom and included sizeable purchases of stocks of recently privatized companies;

- A statistical discrepancy (the balancing item between the recorded estimates of current and capital accounts) equivalent to a net debit of $4.9 billion;

- A relatively stable Canadian dollar (72 U.S. cents) against the United States dollar, even though it touched a record low early in the year. Against all other major currencies, however, the Canadian dollar depreciated, except for the last few months when it strengthened against the British pound and the Japanese yen.

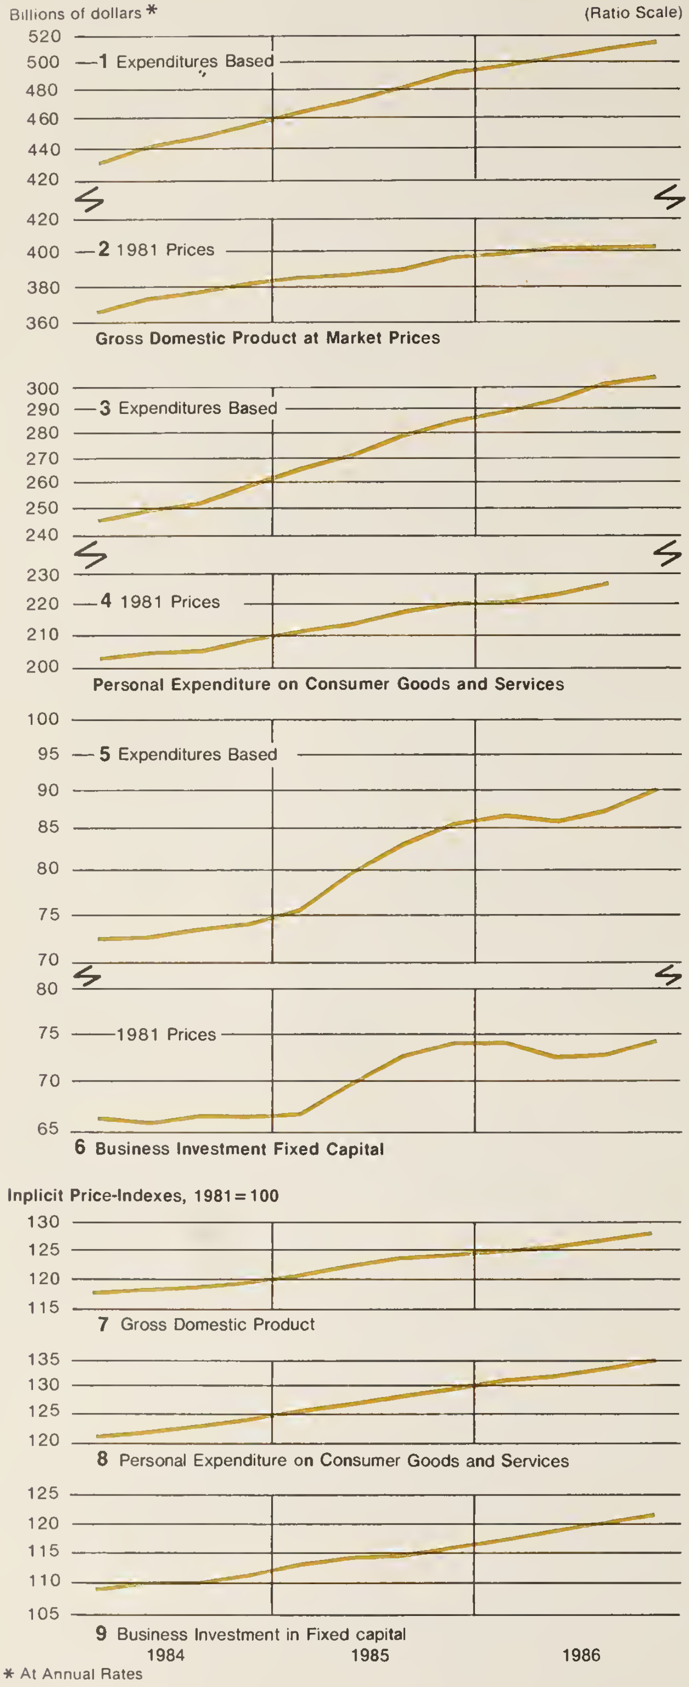
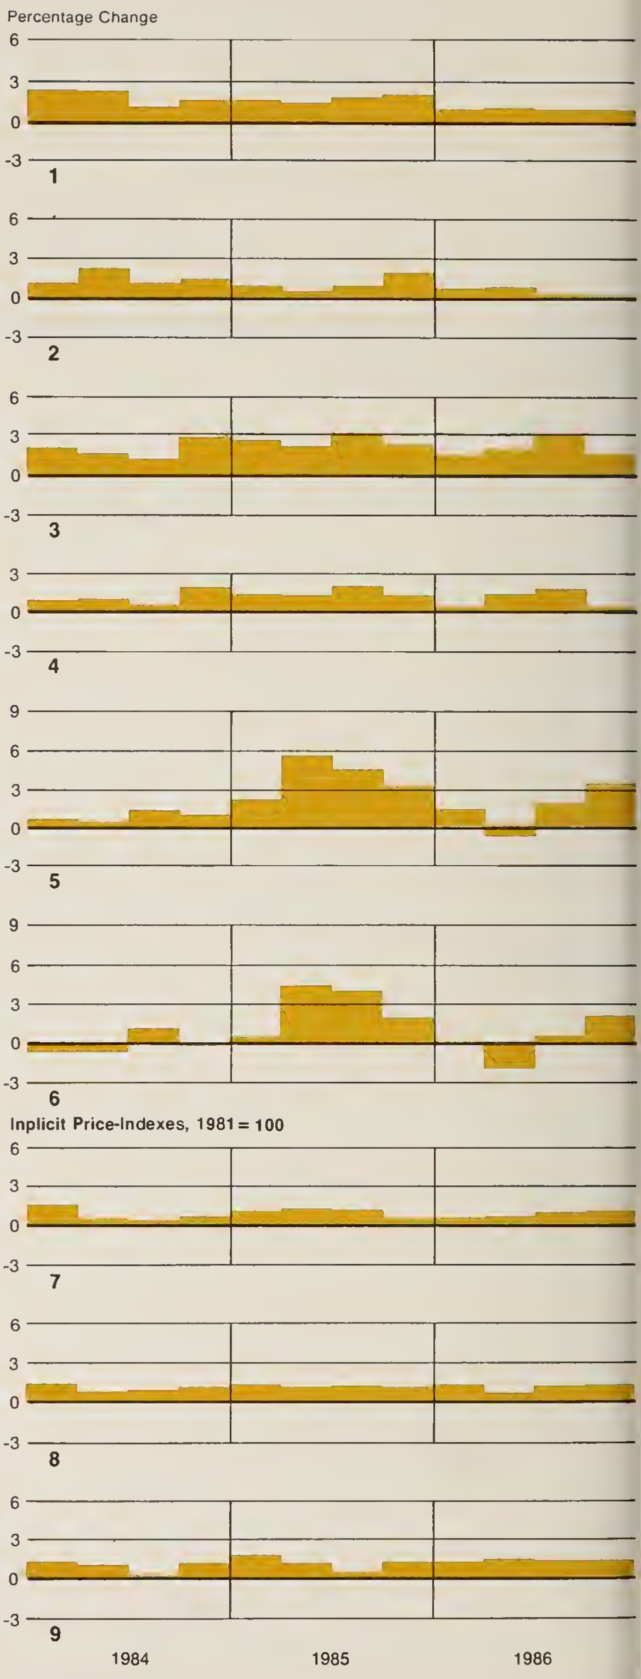
Section 1 ▪ Selected Economic Indicators Analytical Summary

1.7 Charts
8.11 Analytical Summary
12 Business Leading Indicators for Canada

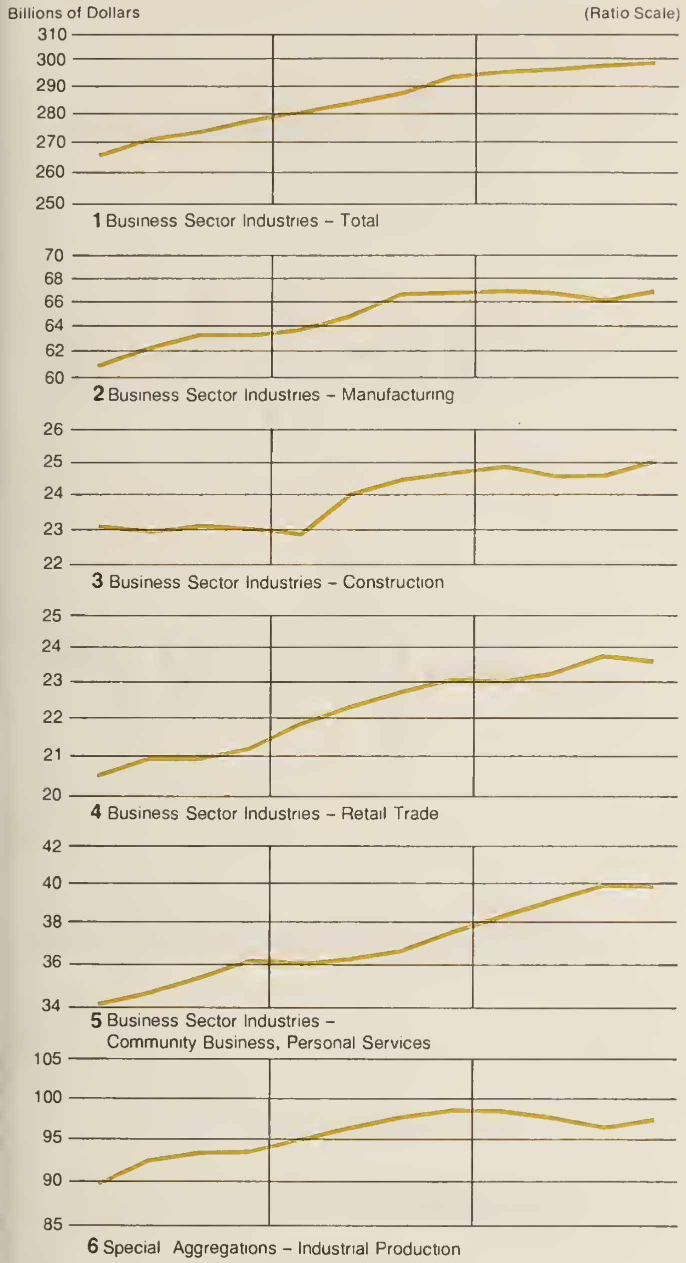
Selected Economic Indicators — Seasonally Adjusted





Selected Economic Indicators — Seasonally Adjusted

Gross Domestic Product at factor Cost – in 1981 Prices



1 Business Sector Industries – Total

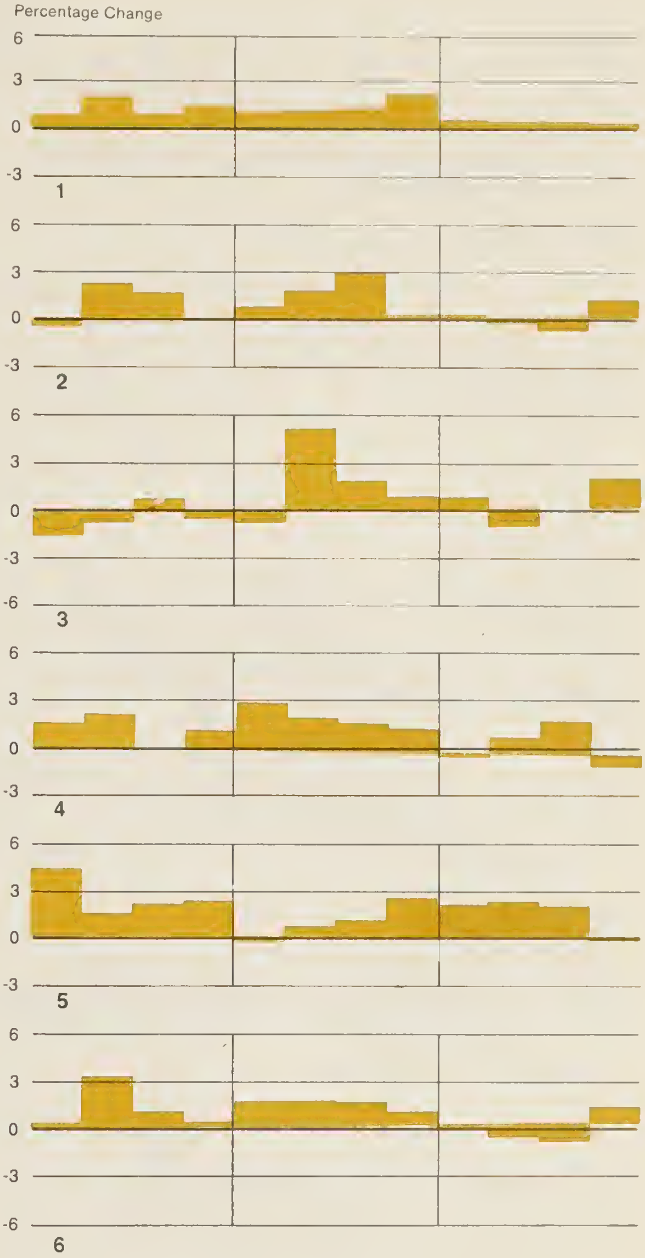
2 Business Sector Industries – Manufacturing

3 Business Sector Industries – Construction

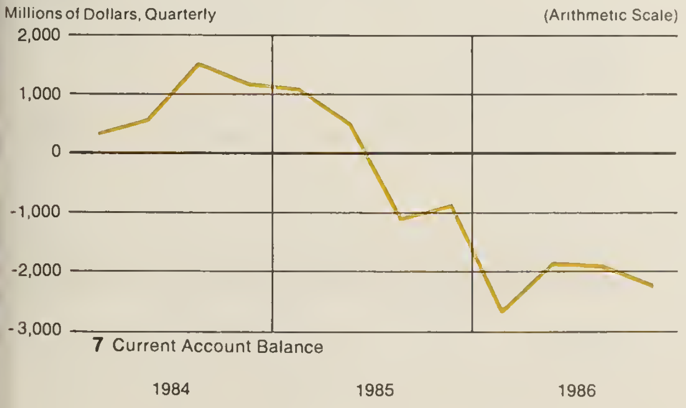
4 Business Sector Industries – Retail Trade

5 Business Sector Industries – Community Business, Personal Services

6 Special Aggregations – Industrial Production

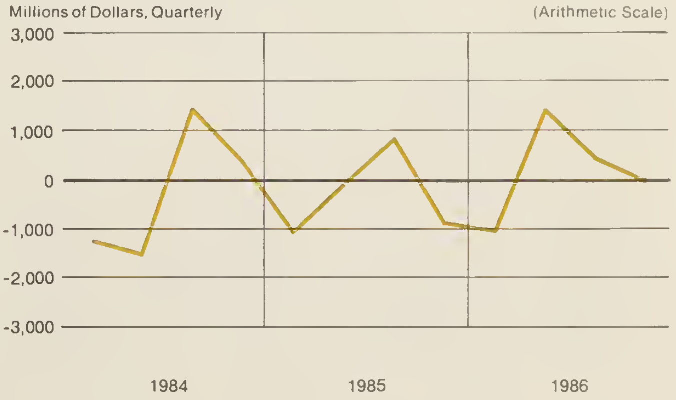


Canadian Balance of International Payments

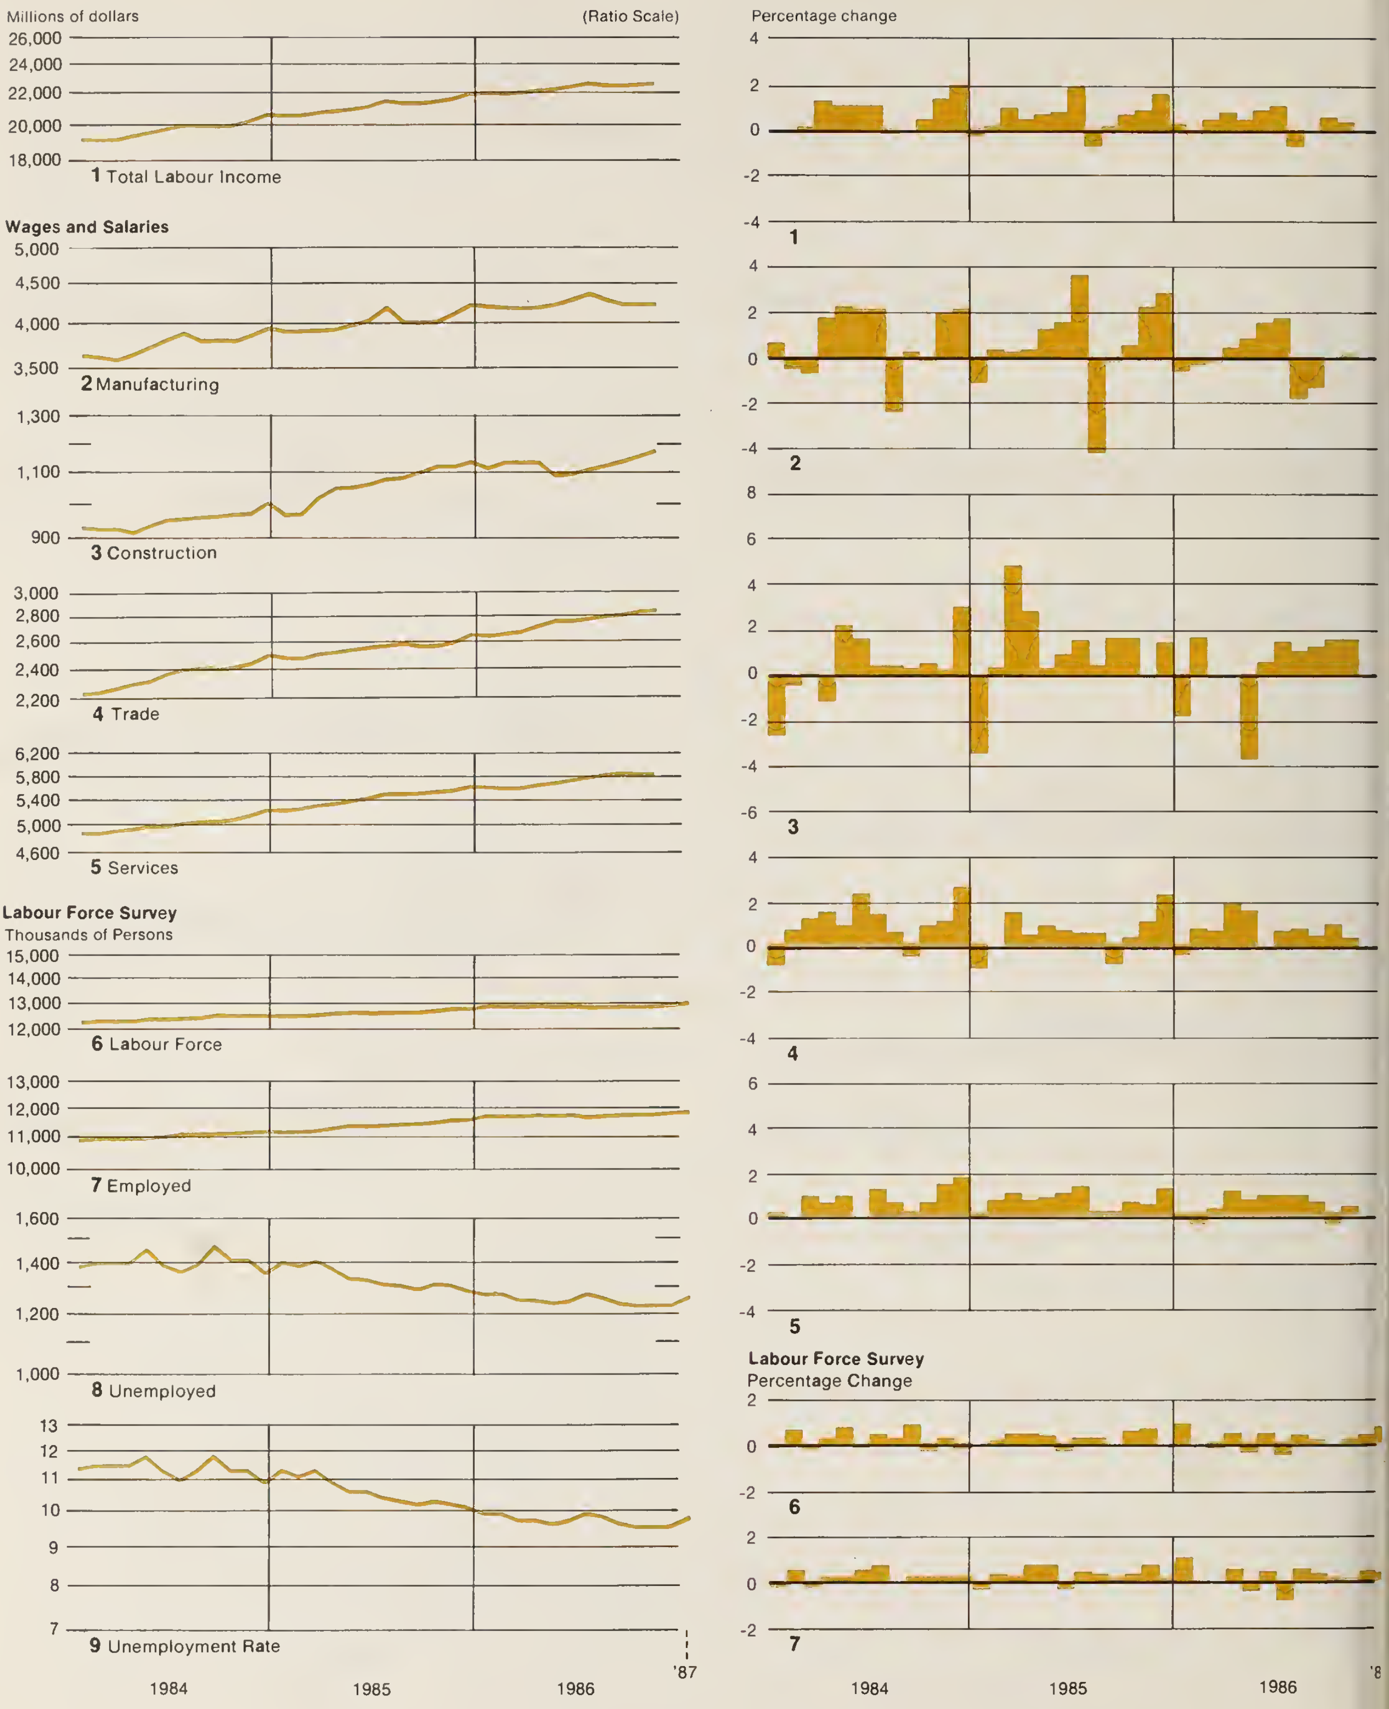


7 Current Account Balance

Net Official Monetary Movements

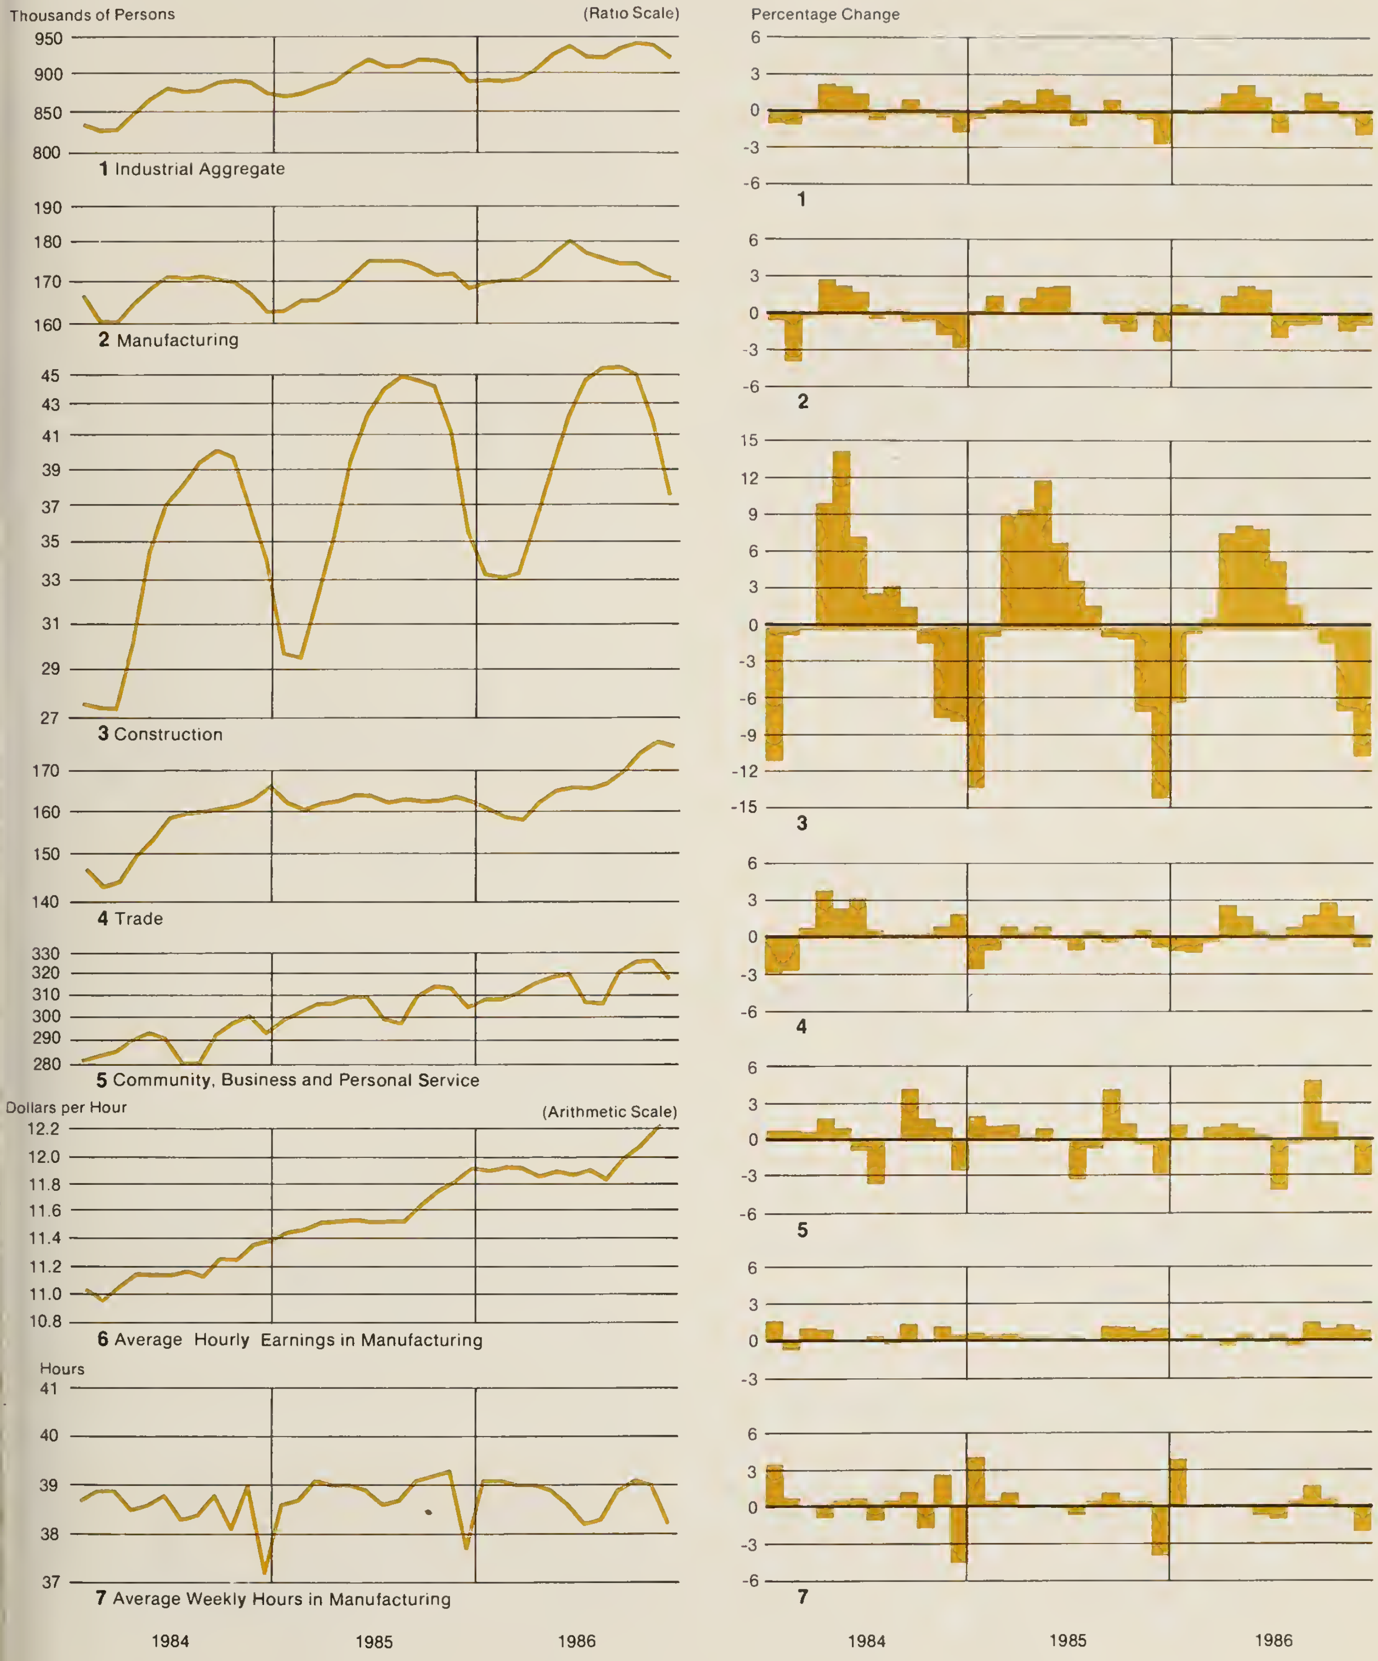


Selected Economic Indicators — Seasonally Adjusted

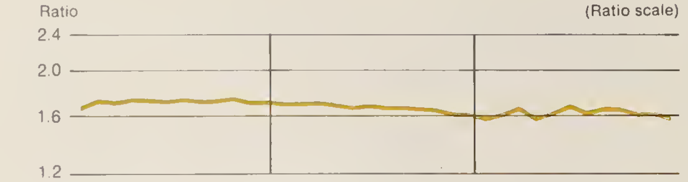


Selected Economic Indicators — Seasonally Adjusted

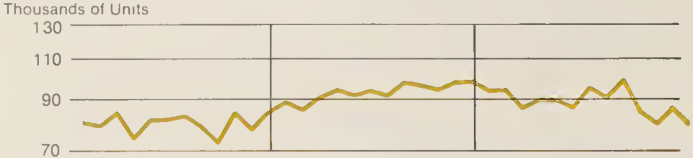
Employment Survey, Total Number of Employees by Industry Group



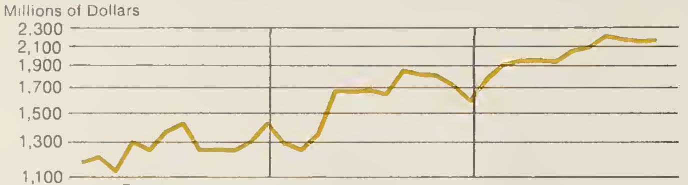
Selected Economic Indicators — Seasonally Adjusted



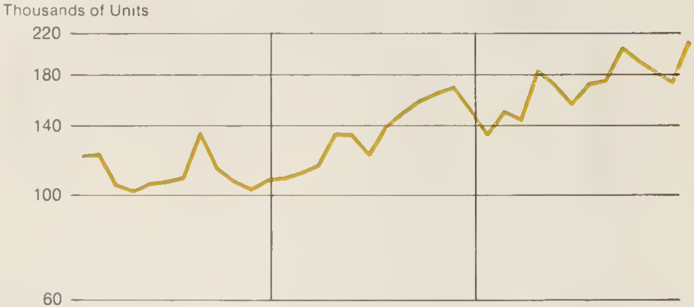
1 Ratio of Manufacturing Inventories Owned to Shipments



2 New Passenger Car Sales

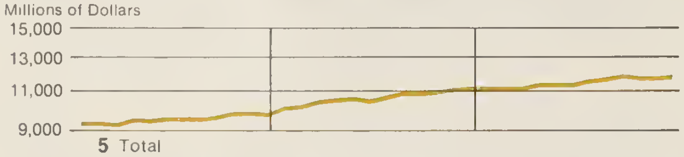


3 Building Permits Total

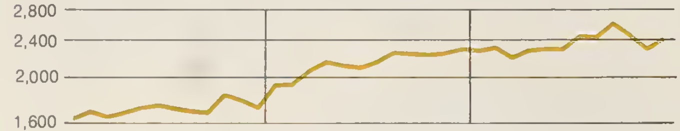


4 New Dwelling Units Started (Centres of 10,000 and Over)

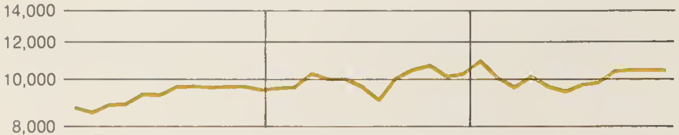
Value of Retail Trade



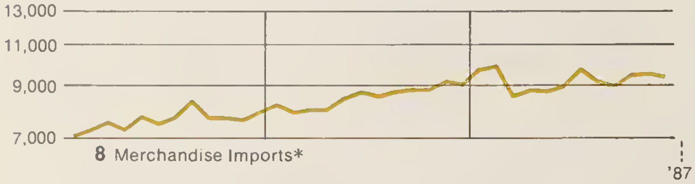
5 Total



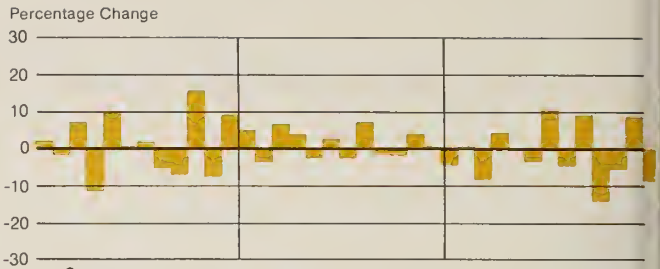
6 Motor Vehicles



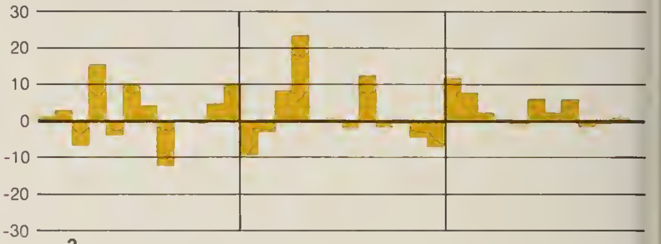
7 Merchandise Exports (Including Re-Exports)*



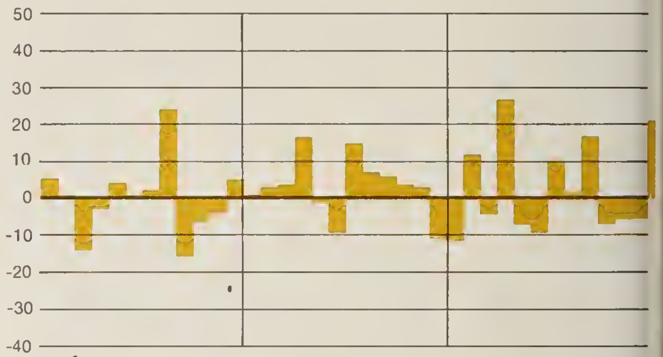
8 Merchandise Imports*



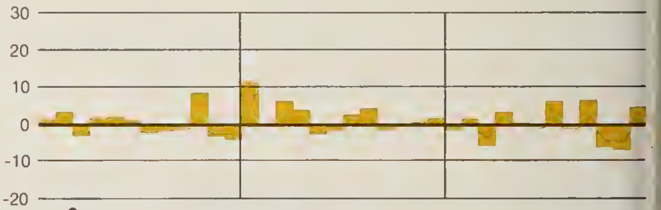
2



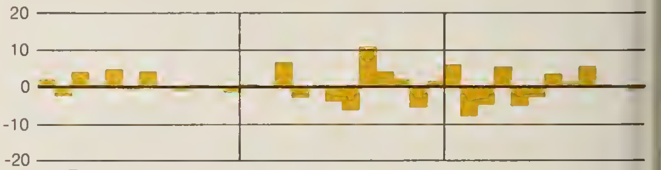
3



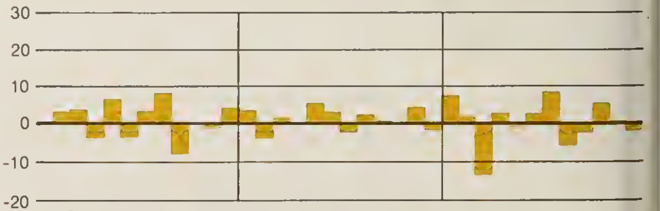
4



6



7



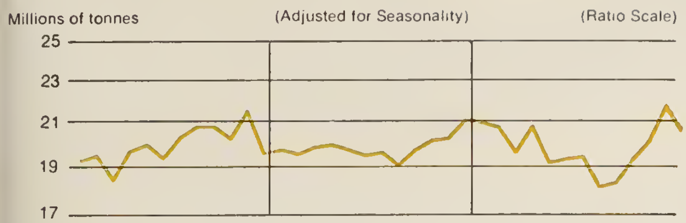
8

1984 1985 1986

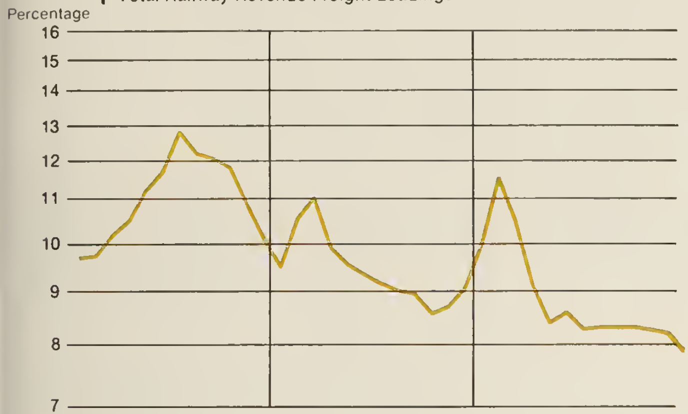
---

* Balance of payments basis.

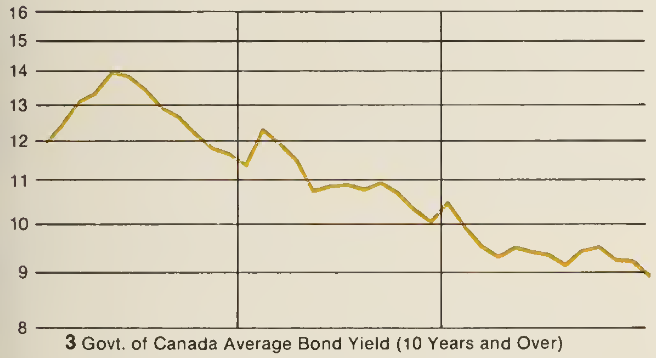
Selected Economic Indicators



1 Total Railway Revenue Freight Loadings

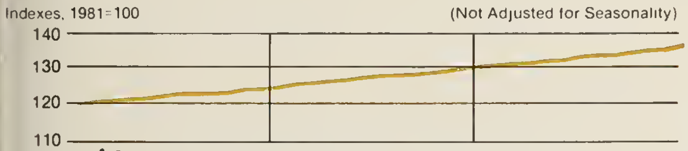


2 Three-Month Treasury Bill Yield

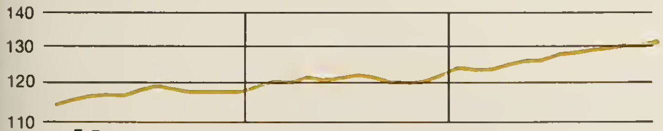


3 Govt. of Canada Average Bond Yield (10 Years and Over)

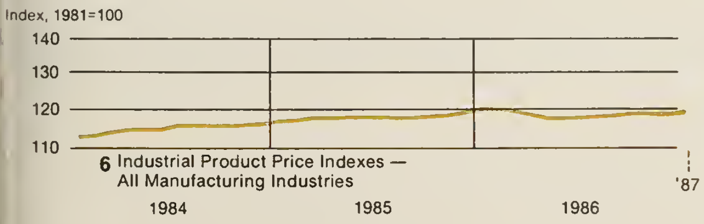
Price Indexes



4 Consumer Price Index, All Items



5 Food



6 Industrial Product Price Indexes —
All Manufacturing Industries

[1] As of the first of each month, quarterly and annual data from 1951 to April 1, 1981 are intercensal estimates; the June 3, 1981 Census Count has been adjusted to correspond to June 1, final postcensal estimates from July 1, 1981 to June 1, 1982; updated postcensal estimates from July 1, 1982 to October 1, 1983 and preliminary postcensal estimates from January 1, to October 1, 1984. For an explanation of population estimates methodology and data sources, see Catalogues 91-210 (first issue) and 91-001, Vol. 10, No. 2.

Sources: Quarterly Estimates of Population for Canada, the Provinces and the Territories (91-001), Postcensal Annual Estimates of Population by Marital Status, Age, Sex and Components of Growth for Canada, Provinces and Territories at June 1st (91-201).

---

[1] The occupational status of the majority of the persons destined to the labour force is determined by immigration officials by an examination of documentary evidence provided by the immigrants. The classification of occupations is similar to that used in the 1971 Census; see Occupational Classification Manual, Census of Canada, 1971, Catalogue Number 12-536E, Vol. I. [2] Beginning with 1978, this is subdivided into entrepreneurs and managers-administrators. For breakdown refer to CANSIM main base. [3] Includes logging, fishing, trapping and hunting. [4] Includes mechanical and construction. [5] Includes a small number in non-specified occupations [6] Beginning with 1978 includes fiancés and fiancées [7] Does not include students entering Canada on students' visas. [8] Includes also retired persons, elderly dependents, and other unspecified persons.

Section 3 ▪ System of National Accounts

1. Income and Expenditure Accounts

18 1.1 Gross Domestic Product, Income Based
18 1.2 Gross Domestic Product, Expenditure Based
19 1.3 Gross Domestic Product at 1981 Prices, Expenditure Based
19 1.4 Relation Between Gross Domestic Product at Market Prices, Gross National Product at Market Prices, and Net National Income at Factor Cost
20 1.5 Sources and Disposition of Gross Saving
20 1.6 Sources and Disposition of Personal Income
21 1.7 Personal Expenditure on Consumer Goods and Services by Type of Expenditure
22 1.8 Personal Expenditure on Consumer Goods and Services by Type of Expenditure, at 1981 Prices
22 1.9 Government Sector Revenue and Expenditure
23 1.10 Federal Government Revenue and Expenditure
24 1.11 Provincial Government Revenue and Expenditure
25 1.12 Local Government Revenue and Expenditure
26 1.13 Hospital Revenue and Expenditure
26 1.14 Canada and Quebec Pension Plan Revenue and Expenditure
27 1.15 Implicit Price Indexes, Gross Domestic Product, (1981-100). Seasonally Adjusted at Annual Rates

2. Domestic Product by Industry at Factor Cost

28 2.1 Gross Domestic Product by Industry at Factor Cost in 1981 prices, Quarterly
30 2.2 Gross Domestic Product by Industry at Factor Cost in 1981 Prices, Monthly

3. Balance of International Payments

37 3.1 Canadian Balance of International Payments, Current Account, All Countries
38 3.2 Canadian Balance of International Payments, Current Account, Area Distribution
39 3.3 Canadian Balance of International Payments, Capital Account, All Countries

Table 1. Income and expenditure accounts

Table 1.1: Gross domestic product, income based (millions of current dollars).

Year and quarter	Wages, salaries, and supplementary labour income[1]	Corporation profits before taxes[2]	Interest & misc. investment income[2,3]	Accr'd net income of farm operators from farm prod.[4]	Net income of non-farm unincorp. business incl. rent	Inventory valuation adjustment[5]	Net domestic income at factor cost	Indirect taxes less subsidies	Capital consumption allowances	Statistical discrepancy	Gross domestic product at market prices

---

[1] Includes military pay and allowances. [2] These aggregates differ from those shown in earlier publications in that they are on a "domestic" basis and thus include interest and dividends paid to non-residents and exclude interest and dividends received from non-residents. [3] Includes profits (net of losses) of government business enterprises and other government investment income. [4] Includes value of physical change in farm inventories. An adjustment has been made to take account of the accrued earnings of farm operators arising out of the operations of the Canadian Wheat Board. Book value of inventories is deflated to remove the effect of price changes and the derived physical change is then valued at average prices of the current period to obtain the value of physical change. The difference between this value of physical change and the change in book value is called the inventory valuation adjustment. [5] See footnote 3, Table 1.2.

---

[1] Includes outlay on new durable assets such as building and highway construction by governments other than government business enterprises. Excludes defence construction and equipment which is defined as current expenditure. [2] Includes capital expenditures by private and government business enterprises, private non-commercial institutions and outlays on new residential construction by individuals. Capital expenditure is defined to include all transfer costs on the sales and purchases of existing fixed assets. [3] The book value of inventories is deflated to remove the effect of price change and the derived "physical" change is then valued at average prices of the current period to obtain the value of physical change. The difference between the value of physical change and the change in book value is called the inventory valuation adjustment (shown in Table 1.1). [4] See footnote 4, Table 1.1. [5] Excludes investment income received from non-residents. [6] Excludes investment income paid to non-residents.

[1] The period 1961-1986 was deflated in three time periods 1961-1971; 1971-1981, 1981-1986 with price indexes based on 1961, 1971 and 1981 respectively The prices were then linked arithmetically at the major group, component and total levels to the 1981 base The linking process produced residual differences between the sum of the linked groups and linked aggregates These differences are shown as adjusting entries [2] Excludes investment income received from non-residents. [3] Excludes investment income paid to non-residents

---

[1] The quarterly figures of real property taxes unadjusted and seasonally adjusted are obtained by dividing annual totals by four Since real property tax rates have been generally upward, this treatment gives rise to a fictitious seasonal between the fourth and first quarters in the seasonally adjusted tax series. [2] Includes capital consumption allowances [3] Includes net purchase of existing non-financial assets.

[1] These implicit price indexes derived by dividing the value figures in current dollars by the constant dollar figures, are current weighted price indexes. They reflect not only pure price changes, but also changing expenditure patterns within and between major groups. Quarter-to-quarter comparisons based on the seasonally adjusted data are less subject to the problem of shifting weights than are similar comparisons based on data for seasonality and therefore may be used as indicators of price changes. [2] Excludes investment income received from non-residents. [3] Excludes investment income paid to non-residents.

---

[1] The labour force as a percentage of the population 15 years of age and over. The participation rate for a particular group (age, sex etc.) is the labour force in that group expressed as a percentage of the population for that group. [2] The unemployed as a percentage of the labour force. The unemployment rate for a particular group (age, sex etc.) is the unemployed in that group expressed as a percentage of the labour force for that group. Seasonally-adjusted rates are calculated by dividing seasonally-adjusted unemployment by the sum of seasonally-adjusted employment and seasonally-adjusted unemployment (i.e. seasonally-adjusted labour force by summation).

Note: Excludes inmates of institutions, members of the armed services, Indians living on reserves and residents of the Yukon and Northwest Territories. The estimates are derived from a sample survey and are subject to sampling error. In general, the smaller the estimate, the larger is the relative sampling error. For other explanatory material see notes at the end of Catalogue No. 71-001.

---

[1] The number of persons covered by unemployment insurance is an estimate comprising armed forces personnel, beneficiaries and paid workers from the Labour Force Survey. [2] Claimants who receive benefits through the Commission's computer pay system during the reference week [3] Benefits paid for adoption, training, work sharing and job creation claims are included in the total benefits paid. [4] Annual figures are 12-month averages.

Source: Unemployment Insurance Statistics (73-001), Statistics Canada. For further details, see introduction and technical notes in Cat. 73-202S, Annual Supplement to 73-001 Monthly.

[1] Statistics on work stoppages include all strikes and lockouts whether legal or illegal, which last for one-half day or more and amount to 10 or more person-days of time lost. Time lost by workers indirectly affected, such as those laid off because of a work stoppage by other employees, is not included. Data is published 45 days after the end of reference month
[2] The industry groups from January 1976 forward, are based on the 1970 Standard Industrial Classification. [3] The number of person-days is calculated by multiplying the number of workers involved in a work-stoppage by the number of normal working days during the stoppage. Adjustments are made for establishments on shift work, etc [4] The total includes all work stoppages. The agriculture, finance, insurance and real estate and public administration and defence industries are not shown separately. Should strikes occur in these industries, the time lost also will be shown in the total. [5] Includes publishing and allied industries. [6] Includes storage and communication industries.

[1] These weights, provided as a general guide, show the relative importance of the major components of the C.P I They are based on expenditure values derived from quantities and prices of year 1982. [2] Includes water, fuel and electricity, and traveller accommodation. [3] Excludes water, fuel and electricity

* "For further information on the weights and methodology associated with the Consumer Price Index, see "The Consumer Price Index Reference Paper, updating based on 1982 expenditures," cat. 62-553, occasional.

Section 6 ▪ Manufacturing

74 1. Total Inventories, Shipments and Orders in Manufacturing
75 2. Manufacturing Shipments by Industry
77 3. Manufacturing Inventories by Industry
79 4. Estimated Value of Shipments and Unfilled Orders by Economic Use Classification
80 5. Estimated Value of Inventories Owned and Raw Materials by Economic Use Classification
81 6. Estimated Value of Goods in Process and finished Products by Economic Use Classification
82 7. Tobacco and Beverages
83 9. Footwear
84 10. Production of Sawn Lumber
84 11. Pulpwood, Wood Pulp and Newsprint
85 12. Primary Iron and Steel
86 13. New Motor Vehicles
87 14. Production of Motor Vehicles in Canada
88 15. Refrigerators, Freezers, Washing Machines and Clothes Dryers

Table 1: Total inventories, shipments and orders in manufacturing based on the 1980 standard industrial classification (million dollars)[1]. Projected from 1982 Census of Manufactures benchmark.

				Inventory at end of month						
						All inventory held				Ratio of inventories owned to shipments
Year and month	Shipments[2]	New orders received during month[3]	Unfilled orders at end of month	Owned[4]	Held but not owned	Total	Raw materials	Goods in process	Finished goods

[1] Estimates of manufacturers' shipments, inventories and orders are based on a monthly survey of a sample of manufacturing establishments, benchmarked to the annual census of manufacturers. [2] Shipments of goods manufactured within the establishments [3] Total new orders received during the period at estimated selling value, net of cancellations. [4] Total manufacturing inventory owned by manufacturing establishments. Other inventory such as that of goods purchased for resale is not included.

Note: All series are subject to revision each year when more recent Census of Manufactures data become available.

Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), Statistics Canada.

Table 2: Manufacturing shipments[1] by industry based on the 1980 standard industrial classification (million dollars). Projected from 1982 Census of Manufactures benchmark.

Year and month	Total shipments	Non-durable goods industries											
		Total	Food	Beverage	Tobacco products	Rubber products	Plastics products	Leather and allied products	Primary textile	Textile products	Clothing	Paper and allied products	Printing publishing and allied

[1] Total inventories owned by manufacturers including warehouse stocks.

Note: All series are subject to revision each year when more recent Census of Manufactures data become available.

Source: **Inventories, Shipments and Orders in Manufacturing Industries (31-001), Statistics Canada.**

Table 4: Estimated value of shipments and unfilled orders in manufacturing industries, by economic use classification, based on the 1980 standard industrial classification (million dollars). Projected from 1982 Census of Manufactures benchmark.

	Shipments[1]							Unfilled orders at end of month						
	Consumer goods							Consumer Goods						
Year and month	Non-durable and semi-durable	Durable	Capital goods	Construction materials and components	Other intermediate goods & supplies	Export-oriented industries	Supplementary classification: automotive products	Non-durable and semi-durable	Durable	Capital goods	Construction materials and components	Other intermediate goods and supplies	Export-oriented industries	Supplementary classification automotive products

---

[1] Separate industries series combined for the Supplementary Classification automotive products, are also components of other classifications. Other economic use classification groups are mutually exclusive and except for rounding differences add to relevant Canada totals in section 6, table 1.

Note: All series are subject to revision each year when more recent Census of Manufactures data become available

Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), Statistics Canada.

Table 5: Estimated value of inventories owned and raw materials in manufacturing industries, by economic use classification, based on the 1980 standard industrial classification (million dollars). Projected from 1982 Census of Manufactures benchmark.

End of period and month	Inventories owned				Inventories held: Total			Inventories held: raw materials						
	Consumer goods				Consumer goods			Consumer goods						
	Non-durable and semi-durable	Capital goods	Construction materials and components	Supplementary classification: automotive products	Durable	Intermediate goods and supplies	Export-oriented industries	Non-durable and semi-durable	Durable	Capital goods	Construction materials and components	Intermediate goods and supplies	Export-oriented industries	Supplementary classification: automotive products

[1] Pulpwood produced for domestic use and excluding exports, but including receipts of purchased roundwood. [2] Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp. [3] Customs exports. [4] Mill shipments destined for export.

---

[1] Data compiled according to the Steel Distribution Index revised January, 1964. [2] Figures on net shipments relate to semi finished and rolled steel products only Shipments to consuming industries of castings, forgings and steel pipe are not included. [3] Excluding shipments for re-processing at maker's own plant. [4] Data compiled as submitted by the steel producers according to the steel industry distribution code

[1] Gas types are included. [2] Includes producers' shipments for export. [3] In some cases these shipments are not at the factory level, and stocks at beginning of month plus production less shipments do not equal stocks at end of month. [4] End of period. [5] Electric and other. [6] Excludes apartment type machines. [7] Excludes other than electric.

Note: Components may not add to totals due to rounding Current figures in this table are preliminary and therefore subject to revision.
[1] Supply and disposition for both Crude Oil and Natural Gas will not agree because of losses, inventory changes, pipeline fuel used etc. [2] Includes crude oil, condensate and pentanes plus.

[1] Includes domestic and imported crude oil, condensate and pentanes plus received by Canadian refineries. [2] Refinery production (from crude oil, condensate and pentanes plus, and commingled propane/butane mixes) plus other materials used. [3] Includes stove oil, kerosene. [4] Includes aviation gasoline and aviation turbo fuel. [5] Includes propane and propane mixes and butane and butane mixes. [6] Includes petro-chemical feed stocks, naphtha specialties, coke, lubricating oil and grease, still gas and other products.

[1] In 1979, approximately 2,000 municipalities are being surveyed

[2] This is an historical series with data available back to 1920. Consistent coverage and volume have been maintained so historical comparisons are possible.

---

[1] A dwelling unit is defined as a structurally separate set of living quarters having its own entrance from outside of the building, or from a common passage inside. These data are the result of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All metropolitan areas and urban centres with a population of 10,000 or more, along with certain other areas of high building activity, are enumerated completely each month. The remainder of the country is covered on a sample basis quarterly.

[1] Price indexes of inputs measure only changes in prices of units of inputs. They do not reflect other important changes in costs of production, such as changing quantities and productivity of inputs. They should not be interpreted, therefore, as equivalent to indexes of cost per unit of input. Direct comparison of them with price indexes of output can yield misleading indications of the changing relationship of costs and income. The price indexes for the last two years are subject to revision. [2] The major groups include additional components than the selected ones shown.

Section 11 ▪ External Trade

1. Merchandise Trade on a Balance of Payments Basis

114 1.1 Total Exports by Major Trading Area and Section, Seasonally Adjusted, Balance of Payments Basis
114 1.2 Imports by Major Trading Area and Section, Seasonally Adjusted, Balance of Payments Basis
115 1.3 Price and Volume Indexes of Total Exports by Section, Seasonally Adjusted, Balance of Payments Basis
115 1.4 Price and Volume Indexes of Imports by Section, Seasonally Adjusted, Balance of Payments Basis
116 1.5 Total Exports by Commodity Grouping, Seasonally Adjusted, Balance of Payments Basis
118 1.6 Imports by Commodity Grouping, Seasonally Adjusted, Balance of Payments Basis

2. Merchandise Trade on a Customs Basis

120 2.1 Total Exports by Country, Not Seasonally Adjusted, Customs Basis
121 2.2 Imports by Country, Not Seasonally Adjusted, Customs Basis
122 2.3 Total Exports by Commodity Grouping, Not Seasonally Adjusted, Customs Basis
124 2.4 Imports by Commodity Grouping, Not Seasonally Adjusted, Customs Basis

1—Merchandise trade on a balance of payments basis

[1] Total exports includes domestic exports and re-exports, for further information please refer to Summary of External Trade (65-001). [2] The figures reflect a number of adjustments applied to the customs totals to make them consistent with the concepts and definitions used in the system of national accounts. For more information about these adjustments, please refer to Quarterly Estimates of the Canadian Balance of International Payments (67-001). [3] For definition of major trading areas and sections, please refer to Summary of External Trade (65-001)

---

[1] Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month. [2] Daily averages for period. [3] Mainly deposits of foreign banks. [4] Capital, rest fund and undivided profits as at the latest fiscal year-end. [5] Including issues payable in foreign currency [6] Excluding Canadian day-to-day loans. [7] Securities purchased direct from issuer with a term of less than one year at time of issue are classified as loans. [8] Loans to finance purchase of Canada Savings Bonds at time of issue. [9] These series reflect the combination of two CANSIM series.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Electronic Data Dissemination Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-8200) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(780-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(973-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

Newfoundland and Labrador	1-800-563-4255
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192
Quebec	1-800-361-2831
Ontario	1-800-268-1151
Manitoba	1-800-282-8006
Saskatchewan	1-800-667-7164
Alberta	1-800-222-6400
British Columbia (South and Central)	1-800-663-1551
Yukon and Northern B.C. (area served by NorthwesTel Inc.)	Zenith 0-8913
Northwest Territories (area served by NorthwesTel Inc.)	Call collect 403-420-2011

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales, Statistics Canada, Ottawa, K1A 0T6.

Canadian Statistical Review

Data in this publication were retrieved from CANSIM† (Official Mark of Statistics Canada for its Canadian Socio-Economic Information Management System), and processed to create a photo-ready copy from which this publication was produced. CANSIM is the Statistics Canada computerized data bank; series published in this Review (as well as other data) are available on computer printouts, cards, tape or directly via terminal.

The identification numbers at the top of each column of data refer to the unadjusted and seasonally adjusted monthly or quarterly data in this column. Series maintained by Statistics Canada carry a "D" prefix (e.g. D 1375). The "B" prefix (e.g. B 1437) identifies series in CANSIM which are maintained by the Bank of Canada.

More details on which data is available can be found in the following:

CANSIM Main Base Series Directory, 1987 — $100.00 Canada, $120.00 other countries

This Directory is an essential instrument for any regular user of the CANSIM Main Base.

The Directory includes:

- a full list of series on the Base, with both matrix /series and databank identifiers,
- an alphabetical subject index with corresponding matrix numbers,
- a list of subject matter contacts,
- and much other useful information.

A subscription to the 1987 Directory includes notification of any changes to the Base, on a quarterly basis.

Another valuable tool for CANSIM users is the 1987 CANSIM Main Base Cross Reference between Databank Identifiers and Matrix and Series Numbers — $25.00 Canada, $30.00 other countries.

CANSIM Mini Base Series Directory, Catalogue 12-569 — $45.00 Canada, $54.00 other countries

This Directory is a detailed guide to the data on th CANSIM Mini Base — a standard subset of data originating from the CANSIM Main Base which is available at various Secondary Distributors.

CANSIM-Cross Classified Data Base Index — $7

This index provides a summary of available data o the Cross Classified Data Base.

CANSIM-Cross Classified Data Base Directory — $20

This directory provides a detailed guide to the Cross Classified Data Base. It provides a descripti of the structure of each table.

The seasonal adjustment method applied to economic time series at Statistics Canada is a computerized ratio-to-moving average method. The sta dard computer program used is the Statistics Canada X-11-ARIMA seasonal adjustment method. Seasonal adjustment removes the effect of repetiti intra-year variations resulting from normal differences in weather, holidays with invariable dates, o other events which repeat with the same timing.

While seasonal adjustment allows a much better look at the underlying trend of a series, the adjust series will contain irregular fluctuations. Small changes between months in the adjusted series m simply be erratic movements and, to obtain a clearer idea of the underlying trend, users should examine the adjusted series over a number of months. The MCD, or Months for Cyclical Dominance, in a table containing seasonally adjusted series, indicates the smallest span of months for whi the average percent change without regard to sig in the trend cycle is greater than that in the irregular factor. For the smoothest series in MCD is 1, for the most erratic series it is 6. Applying a movi average of the period equal to the MCD tends to smooth irregular movements which may obscure t underlying trend.

ditorial Board

is publication is produced under the guidance of
e Canadian Statistical Review Editorial Board,
mposed of the following members:

S. Wells (Acting Chairman) — Assistant Chief Statistician, National Accounts and Analytical Services Field
E. Drover — Director, Transportation Division
J. Lynch — Director General, Operations Branch
Boyko — Director, Electronic Data Dissemination Division
J. Brackstone — Director General, Methodology Branch
A. Meguerditchian — Director, International and Financial Economics Division
L.O. Stone — Director, Population Studies Division
P.N. Triandafillou — Director, Agriculture/Natural Resources Division
K. Lal — Director General, System of National Accounts Branch
D. Bergeron — Editor, Canadian Statistical Review

Inquiries about the contents of the Canadian Statistical Review should be directed to the editor at: Electronic Data Dissemination Division, 9th Floor, R.H. Coats Bldg., Tunney's Pasture, Ottawa, Ontario, K1A 0T6.

ubscriptions

he *Canadian Statistical Review* and other
atalogued publications of Statistics Canada, may
e ordered from Publication Sales and Services,
tatistics Canada, Ottawa, K1A 0T6 and remittances
ade payable to the Receiver General for Canada.

Correspondence should be directed to the *Canadian Statistical Review* Electronic Data Dissemination Division, Statistics Canada. R.H. Coats Tower, Ottawa, Ontario, K1A 0T6.

* Actual data

Note: Percentage changes are based on seasonally adjusted data unless otherwise indicated. Monthly and quarterly series and their CANSIM identifiers appear in Sections and Tables identified at the head of the data columns.

¹Data from 1966-1969 are based on the 1960 Standard Industrial Classification; 1970-1980 (1970 SIC) and 1981 onwards (1980 S.I.C.).

Selected economic indicators—analytical summary

Value of retail trade		Balance of payments basis					Not seasonally adjusted			Years, quarters and months	
Total	Motor vehicle dealers	Merchandise exports (including re-exports)	Merchandise imports	Total railway revenue freight loadings metric tonnes	Three month treasury bill yield	Gov't of Canada average bond yield 10 years and over	Consumer price index All items	Consumer price index Food	Industrial product price index manufacturing

---

[1] In general the term filtering refers to removing, or filtering out, movements of the data that repeat themselves with roughly the same frequency [2] Composite Index of Housing Starts (units), Building Permits (dollars), and Mortgage Loan Approvals (number). [3] Deflated by the Consumer Price Index [4] Toronto Stock Exchange (300 Stock Index excluding oil and gas component).

---

he occupational status of the majority of the persons destined to the labour force is determined by immigration officials by an examination of documentary evidence provided by the migrants. The classification of occupations is similar to that used in the 1971 Census; see Occupational Classification Manual, Census of Canada, 1971, Catalogue Number 12-536E, l. 1. [2] Beginning with 1978, this is subdivided into entrepreneurs and managers-administrators. For breakdown refer to CANSIM main base [3] Includes logging, fishing, trapping and nting [4] Includes mechanical and construction. [5] Includes a small number in non-specified occupations. [6] Beginning with 1978 includes fiancés and fiancées [7] Does not include idents entering Canada on students' visas. [8] Includes also retired persons, elderly dependents, and other unspecified persons.

---

[1] Includes military pay and allowances. [2] These aggregates differ from those shown in earlier publications in that they are on a "domestic" basis and thus include interest and dividends paid to non-residents and exclude interest and dividends received from non-residents. [3] Includes profits (net of losses) of government business enterprises and other government investment income. [4] Includes value of physical change in farm inventories. An adjustment has been made to take account of the accrued earnings of farm operators arising out of the operations of the Canadian Wheat Board. Book value of inventories is deflated to remove the effect of price changes and the derived physical change is then valued at average prices of the current period to obtain the value of physical change. The difference between this value of physical change and the change in book value is called the inventory valuation adjustment. [5] See footnote 3, Table 1.2.

---

[1] Includes outlay on new durable assets such as building and highway construction by governments other than government business enterprises. Excludes defence construction and equipment which is defined as current expenditure. [2] Includes capital expenditures by private and government business enterprises, private non-commercial institutions and outlays on new residential construction by individuals. Capital expenditure is defined to include all transfer costs on the sales and purchases of existing fixed assets. [3] The book value of inventories is deflated to remove the effect of price change and the derived "physical" change is then valued at average prices of the current period to obtain the value of physical change. The difference between the value of physical change and the change in book value is called the inventory valuation adjustment (shown in Table 1.1). [4] See footnote 4, Table 1.1. [5] Excludes investment income received from non-residents. [6] Excludes investment income paid to non-residents.

[1] The period 1961-1986 was deflated in three time periods 1961-1971; 1971-1981, 1981-1986 with price indexes based on 1961, 1971 and 1981 respectively The prices were then linked arithmetically at the major group, component and total levels to the 1981 base The linking process produced residual differences between the sum of the linked groups and linked aggregates. These differences are shown as adjusting entries [2] Excludes investment income received from non-residents [3] Excludes investment income paid to non-residents.

---

he quarterly figures of real property taxes unadjusted and seasonally adjusted are obtained by dividing annual totals by four. Since real property tax rates have been generally upward, s treatment gives rise to a fictitious seasonal between the fourth and first quarters in the seasonally adjusted tax series. [2] Includes capital consumption allowances. [3] Includes net rchase of existing non-financial assets.

These implicit price indexes derived by dividing the value figures in current dollars by the constant dollar figures, are current weighted price indexes They reflect not only pure price hanges, but also changing expenditure patterns within and between major groups. Quarter-to-quarter comparisons based on the seasonally adjusted data are less subject to the probem of shifting weights than are similar comparisons based on data for seasonality and therefore may be used as indicators of price changes. [2]Excludes investment income received rom non-residents. [3]Excludes investment income paid to non-residents.

---

[1] The labour force as a percentage of the population 15 years of age and over. The participation rate for a particular group (age, sex etc.) is the labour force in that group expressed as a percentage of the population for that group. [2] The unemployed as a percentage of the labour force. The unemployment rate for a particular group (age, sex etc.) is the unemployed in that group expressed as a percentage of the labour force for that group. Seasonally-adjusted rates are calculated by dividing seasonally-adjusted unemployment by the sum of seasonally-adjusted employment and seasonally-adjusted unemployment (i.e. seasonally-adjusted labour force by summation).

Note: Excludes inmates of institutions, members of the armed services, Indians living on reserves and residents of the Yukon and Northwest Territories. The estimates are derived from a sample survey and are subject to sampling error. In general, the smaller the estimate, the larger is the relative sampling error. For other explanatory material see notes at the end of Catalogue No. 71-001

---

[1] The number of persons covered by unemployment insurance is an estimate comprising armed forces personnel, beneficiaries and paid workers from the Labour Force Survey. [2] Claimants who receive benefits through the Commission's computer pay system during the reference week. [3] Benefits paid for adoption, training, work sharing and job creation claims are included in the total benefits paid. [4] Annual figures are 12-month averages.

Statistics on work stoppages include all strikes and lockouts whether legal or illegal, which last for one-half day or more and amount to 10 or more person-days of time lost. Time lost y workers indirectly affected, such as those laid off because of a work stoppage by other employees, is not included Data is published 45 days after the end of reference month The industry groups from January 1976 forward, are based on the 1970 Standard Industrial Classification [3]The number of person-days is calculated by multiplying the number of orkers involved in a work-stoppage by the number of normal working days during the stoppage Adjustments are made for establishments on shift work, etc [4]The total includes all ork stoppages. The agriculture, finance, insurance and real estate and public administration and defence industries are not shown separately Should strikes occur in these industries, e time lost also will be shown in the total. [5]Includes publishing and allied industries. [6]Includes storage and communication industries.

hese weights, provided as a general guide, show the relative importance of the major components of the C.P.I. They are based on expenditure values derived from quantities and ices of year 1982. [2] Includes water, fuel and electricity, and traveller accommodation. [3] Excludes water, fuel and electricity

For further information on the weights and methodology associated with the Consumer Price Index, see "The Consumer Price Index Reference Paper, updating based 1982 expenditures," cat. 62-553, occasional.

[1] Estimates of manufacturers' shipments, inventories and orders are based on a monthly survey of a sample of manufacturing establishments, benchmarked to the annual census of manufacturers. [2] Shipments of goods manufactured within the establishments. [3] Total new orders received during the period at estimated selling value, net of cancellations. [4] Total manufacturing inventory owned by manufacturing establishments Other inventory such as that of goods purchased for resale is not included.

Note: All series are subject to revision each year when more recent Census of Manufactures data become available.

[1] Estimates of manufacturers' shipments are based on a monthly survey of a sample of manufacturing establishments, benchmarked to the annual census of manufacturers.

Note. All series are subject to revision each year when more recent Census of Manufactures data become available

Table 2: Manufacturing shipments[1] by industry based on the 1980 standard industrial classification (million dollars). Projected from 1982 Census of Manufactures benchmark./concluded

	Non-durable goods (concl.)		Durable goods industries

---

[1] Total inventories owned by manufacturers including warehouse stocks.

Note All series are subject to revision each year when more recent Census of Manufactures data become available.

Source: **Inventories, Shipments and Orders in Manufacturing Industries (31-001), Statistics Canada.**

Table 4: Estimated value of shipments and unfilled orders in manufacturing industries, by economic use classification, based on the 1980 standard industrial classification (million dollars). Projected from 1982 Census of Manufactures benchmark.

	Shipments[1]							Unfilled orders at end of month						
	Consumer goods							Consumer Goods						
Year and month	Non-durable and semi-durable	Durable	Capital goods	Con-struction materials and compo-nents	Other inter-mediate goods & supplies	Export-oriented industries	Supple-mentary classifi-cation. auto-motive products	Non-durable and semi-durable	Durable	Capital goods	Con-struction materials and com-ponents	Other inter-mediate goods and supplies	Export-oriented indus-tries	Supple-mentary classifi-cation auto-motive products

---

[1] Separate industries series combined for the Supplementary Classification automotive products, are also components of other classifications. Other economic use classification groups are mutually exclusive and except for rounding differences add to relevant Canada totals in section 6, table 1.

Note: All series are subject to revision each year when more recent Census of Manufactures data become available

Source: Inventories, Shipments and Orders in Manufacturing Industries (31-001), Statistics Canada.

Table 5: Estimated value of inventories owned and raw materials in manufacturing industries, by economic use classification, based on the 1980 standard industrial classification (million dollars). Projected from 1982 Census of Manufactures benchmark.

End of period and month	Inventories owned				Inventories held: Total			Inventories held: raw materials						
	Consumer goods				Consumer goods			Consumer goods						
	Non-durable and semi-durable	Capital goods	Construction materials and components	Supplementary classification: automotive products	Durable	Intermediate goods and supplies	Export-oriented industries	Non-durable and semi-durable	Durable	Capital goods	Construction materials and components	Intermediate goods and supplies	Export-oriented industries	Supplementary classification: automotive products

---

[1] Pulpwood produced for domestic use and excluding exports, but including receipts of purchased roundwood. [2] Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp. [3] Customs exports. [4] Mill shipments destined for export.

Sources: Pulpwood and Wood Residue Statistics (25-001), Exports by Commodities (65-004), Statistics Canada; Bulletins of the Canadian Pulp and Paper Association: "Monthly Pulp Summary" and "Monthly Newsprint Statistics".

[1] Gas types are included. [2] Includes producers' shipments for export [3] In some cases these shipments are not at the factory level, and stocks at beginning of month plus production less shipments do not equal stocks at end of month. [4] End of period. [5] Electric and other. [6] Excludes apartment type machines. [7] Excludes other than electric.

Note: Components may not add to totals due to rounding. Current figures in this table are preliminary and therefore subject to revision

[1] Supply and disposition for both Crude Oil and Natural Gas will not agree because of losses, inventory changes, pipeline fuel used etc. [2] Includes crude oil, condensate and pentanes plus.

[1] Includes domestic and imported crude oil, condensate and pentanes plus received by Canadian refineries. [2] Refinery production (from crude oil, condensate and pentanes plus, and commingled propane/butane mixes) plus other materials used [3] Includes stove oil, kerosene. [4] Includes aviation gasoline and aviation turbo fuel. [5] Includes propane and propane mixes and butane and butane mixes. [6] Includes petro-chemical feed stocks, naphtha specialties, coke, lubricating oil and grease, still gas and other products.

A dwelling unit is defined as a structurally separate set of living quarters having its own entrance from outside of the building, or from a common passage inside. These data are the sult of a nation-wide survey, for which the field work is carried out by the Central Mortgage and Housing Corporation. All metropolitan areas and urban centres with a population of 0,000 or more, along with certain other areas of high building activity, are enumerated completely each month. The remainder of the country is covered on a sample basis quarterly

---

[1] Price indexes of inputs measure only changes in prices of units of inputs. They do not reflect other important changes in costs of production, such as changing quantities and productivity of inputs. They should not be interpreted, therefore, as equivalent to indexes of cost per unit of input. Direct comparison of them with price indexes of output can yield misleading indications of the changing relationship of costs and income. The price indexes for the last two years are subject to revision. [2] The major groups include additional components than the selected ones shown.

Section 11 ▪ External Trade

1. **Merchandise Trade on a Balance of Payments Basis**

114 1.1 Total Exports by Major Trading Area and Section, Seasonally Adjusted, Balance of Payments Basis
114 1.2 Imports by Major Trading Area and Section, Seasonally Adjusted, Balance of Payments Basis
115 1.3 Price and Volume Indexes of Total Exports by Section, Seasonally Adjusted, Balance of Payments Basis
115 1.4 Price and Volume Indexes of Imports by Section, Seasonally Adjusted, Balance of Payments Basis
116 1.5 Total Exports by Commodity Grouping, Seasonally Adjusted, Balance of Payments Basis
18 1.6 Imports by Commodity Grouping, Seasonally Adjusted, Balance of Payments Basis

2. **Merchandise Trade on a Customs Basis**

20 2.1 Total Exports by Country, Not Seasonally Adjusted, Customs Basis
21 2.2 Imports by Country, Not Seasonally Adjusted, Customs Basis
22 2.3 Total Exports by Commodity Grouping, Not Seasonally Adjusted, Customs Basis
24 2.4 Imports by Commodity Grouping, Not Seasonally Adjusted, Customs Basis

[1] Total exports includes domestic exports and re-exports, for further information please refer to Summary of External Trade (65-001). [2] The figures reflect a number of adjustments applied to the customs totals to make them consistent with the concepts and definitions used in the system of national accounts. For more information about these adjustments, please refer to Quarterly Estimates of the Canadian Balance of International Payments (67-001). [3] For definition of major trading areas and sections, please refer to Summary of External Trade (65-001).

[1] Data for 1970 through 1972 refer to class 1 and 2 carriers whose gross annual revenues totalled $500,000 or more. Information for the period January 1973-December 1978 refers to only 6 major railways. Commencing January 1979, data for 7 major railways (accounting for 95 per cent or more of the total operating revenues) are shown.

[1] Bank of Canada deposits are averages of the juridical days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month. [2] Daily averages for period. [3] Mainly deposits of foreign banks [4] Capital, rest fund and undivided profits as at the latest fiscal year-end. [5] Including issues payable in foreign currency [6] Excluding Canadian day-to-day loans. [7] Securities purchased direct from issuer with a term of less than one year at time of issue are classified as loans [8] Loans to finance purchase of Canada Savings Bonds at time of issue. [9] These series reflect the combination of two CANSIM series.
